Regarding taking this course	This course is a class in which students acquire English skills useful in actual tourism settings through activities. It values practical communication such as "listening to the other person," "conveying necessary information," and "choosing expressions to suit the situation." The course incorporates many role-plays and pair work activities, but you do not need to try to speak well. Do not be afraid of making mistakes; first of all, speaking out loud will lead to improvement more than anything. In tourism settings, you will meet people from diverse backgrounds. Please engage with respect for cultural differences and an attitude of empathy toward the other person. The class will proceed so that those who are good at English and those who are not can participate at their own pace. By actively participating in the activities during class and working with your own ingenuity, you will steadily acquire tourism English as a "usable skill."

Theme	Develop the basic English ability essential for translation.		
Course Objectives and Overview	The goal of this course is to acquire the basic concepts of translation while improving English reading comprehension and expressive ability in Japanese. Accurate understanding of the source text is essential as the basis of translation, but in practice, not only the ability to interpret the source text but also advanced Japanese language proficiency and translational thinking are required. In class, students aim to acquire the ability to translate various kinds of English into Japanese suited to each scene and situation. Through the analysis of concrete translation work, they also come to understand the fundamental differences in ways of thinking and patterns of perception between Japanese and English.

Theme	Acquiring Basic Interpreting Skills and Improving English Speaking Ability		
Course Objectives and Overview	This course targets not only students who aspire to careers such as business interpreter or tour guide-interpreter (licensed guide-interpreter) but also students who aim for occupations requiring advanced English ability, such as overseas sales positions. In class, students adopt the training methods that interpreters actually use (shadowing, sight translation, paraphrasing, note-taking, etc.) and aim to acquire the basic skills of consecutive interpreting required in business and tourism settings. In an age when instant interpretation and translation by AI have become widespread, the course also considers the role that interpreters should play and the importance of the human-specific ability to understand context and of expression that empathizes with feelings, which AI cannot replace.		
Prerequisites and Notes	Students enrolled in this course are expected to engage in approximately 4 hours of self-study per week (review of class content, quizzes, work on assignments, and preparation) toward realizing their desired career paths and achieving the goals they set.		
Relation to the Diploma Policy (DP)	For the relation between this course and the Diploma Policy (DP), please refer to the following URL. https://www.keiho-u.ac.jp/faculty/taken/curriculummap.html		
Learning Outcomes	1. Through basic interpreting training, aim to acquire the English proficiency required in business and tourism settings. 2. In everyday conversation and business settings, improve the responsiveness to switch quickly between English and Japanese using appropriate vocabulary and expressions. 3. With a global and professional perspective, deepen understanding of the role, skills, and qualities of an interpreter that are necessary for smooth communication regardless of the other party's native language.

Theme	Learn to Convey Your Thoughts Accurately and Effectively		
Course Objectives and Overview	The purpose of this course is to acquire techniques for smoothly carrying out communication in Japanese suited to various situations, such as business and social life, and to cultivate expressive ability in using accurate vocabulary and idiomatic expressions correctly. Communication is a mutual exchange in which information is exchanged and human relationships are maintained and built. In this course, focusing mainly on the exchange of information, students cultivate the ability to convey their own opinions appropriately to others, together with the ability to persuade others and convey information so that it is understood. In class, through concrete cases and active methods using role-plays, students learn how the same message changes depending on the situation and position and how it needs to be changed.

Theme	Acquire the techniques of logical thinking needed to write papers and reports.		
Course Objectives and Overview	The goal of this course is to understand the characteristics of academic writing needed to write papers and reports and to improve academic writing ability. First, students understand that writing a paper or report means thinking about things rationally and expressing them in persuasive words. On that basis, they deepen their understanding of the techniques of logical thinking while working on practice exercises, so that they can use them in writing. After each class, students submit a reflection sheet to deepen their understanding of the techniques studied in class. Through self-checking of the texts each student has written, exchange of opinions among students, and comments from the instructor, they also improve their ability to revise and polish their writing.

Regarding taking this course	“Keeping promises.” This is the ability first asked of you as a member of society. The key is how proactively you can act on your own while building the habit of keeping promises through the course. Because the course has many assignments, in addition to attending every class, active participation and continuous motivation to improve on the part of the students themselves are necessary. Those whose only aim is to earn credit will not be able to keep up.

Course Title	Comparative Culture	Academic Year	Fall Semester, AY2026
Instructor	Jonathan MILLS	Year Level	234
Course Numbering	For course numbering, please refer to the following URL. https://www.keiho-u.ac.jp/faculty/taken/numbering.html	Credits	2 Credits
Grade	G3	Teaching Method	Lecture
Course Category	Faculty of International Studies Specialized Courses		
Theme	Cultivating a Comparative Cultural Perspective		
Course Objectives and Overview	In this course, students take up concrete subject matter from Japanese culture and other cultures and, through comparing them, aim to understand that cultures have both individual and universal characters and to cultivate the ability to recognize the value of individual cultures. Without being bound by conventional specialized fields, students acquire a way of thinking aimed at interdisciplinary and comprehensive cultural studies using the method of comparison. From the perspective of fostering employability, the course nurtures logical thinking skills and a broad outlook. In the first half of the course (Sessions 1-8), students study cultural comparison against the background of intercultural communication in the workplace and other settings, together with countermeasures; in the second half (Sessions 9-14), they think more deeply about the <culture> and <history> behind the phenomena introduced in the first half.		
Prerequisites and Notes	This course is an advanced course of “Inter-Cultural Understanding” and an advanced course in the “Society/Culture” area of English Communication.		
Relation to the Diploma Policy (DP)	For the relation between this course and the Diploma Policy (DP), please refer to the following URL. https://www.keiho-u.ac.jp/faculty/taken/curriculummap.html		
Learning Outcomes	1. To be able to understand the characteristics of the individual aspects of culture. 2. To be able to analyze cultural differences as objectively as possible. 3. To be able to understand the role of history and culture in determining social norms. 4. To be able to understand the commonalities and differences among different cultures and give concrete examples. 5. Theme	Understand the basic concepts and the current state of multicultural coexistence society.		
Course Objectives and Overview	In this course, students aim to (1) correctly understand and explain the basic concepts of multicultural coexistence studies, (2) understand the current state of multicultural coexistence society through cases, and (3) acquire a way of thinking that enables them to behave appropriately when they themselves are placed in a multicultural coexistence society. As cases, together with the situations of cultural minorities in Japanese society, such as foreign workers, the Ainu people, and Zainichi Koreans, the course broadens its view to the world and takes up issues concerning indigenous peoples, religious minorities, migrant workers, and others, and examines ways of resolving these issues.		
Prerequisites and Notes	[Students enrolled in AY2023 or later] This course is a higher-level course (specialized advanced course) following “The World Seen from Society and Culture” in Foundations for International Studies A and the specialized foundation course International Sociology. Because it is a course in which students acquire the basic concepts of multicultural coexistence studies on the premise of the basic knowledge of intercultural understanding and international sociology studied so far, enrollment is recommended for students who entered in AY2023 or later and selected the English Communication Course. Students who plan to select the Asia-Pacific Course are also recommended to enroll, since this course teaches knowledge and ways of thinking concerning multicultural coexistence studies that should be acquired in a globalizing contemporary society. [Students enrolled in AY2022 or earlier] This course is a higher-level course of “Inter-Cultural Understanding I,” “Inter-Cultural Understanding II,” and “Theory of Intercultural Competence” in the Law, Politics, and Culture field, and belongs to the specialized advanced course group “International Understanding Courses.” Because it is a course in which students acquire the basic knowledge of multicultural coexistence, active enrollment is encouraged.		
Relation to the Diploma Policy (DP)	For the relation between this course and the Diploma Policy (DP), please refer to the following URL. https://www.keiho-u.ac.jp/faculty/taken/curriculummap.html		
Learning Outcomes	① To be able to understand the basic concepts of multicultural coexistence society. ② To be able to understand the current state of multicultural coexistence in Japan and overseas from concrete cases. ③ To acquire a way of thinking that enables appropriate behavior when placed in a multicultural coexistence society oneself.

Regarding taking this course	“Multiculturalism” is an everyday phenomenon in Japanese society as well. Especially in the second half of this course, we will look at concrete initiatives aimed at multicultural coexistence, so do not let it end as “desk study”; try to see it as something happening around you and relating to you. From that attitude, simple questions should arise. This course values such simple questions, and students submit questions and comments on the Learning Portal within one week after each class. If you approach the course with questions and curiosity, the necessary knowledge and understanding will naturally follow. The preparatory readings for each class will be posted on the Learning Portal, so read them in advance before attending class.

Regarding taking this course	First, what is “culture” ? As concrete examples we can cite customs, language, and ways of life, but would collecting many of them make up the whole called “culture” ? And what about “multiculture” ? When people from various countries and regions gather, can it be said to be a “multicultural” situation? In such circumstances, what does it mean to encounter and understand other cultures? In this course, we will reconsider culture, which we often hear about but find elusive when we think about it again, as well as other cultures and multiculturalism. There is no single correct answer anywhere, but let us struggle with it together.

Theme	Acquiring Knowledge of Japanese Culture		
Course Objectives and Overview	This course is conducted entirely in English. The purpose of the course is to acquire knowledge of Japanese culture. Specifically, with the central goal of deepening understanding of the culture of the early modern period, which can be called the foundation of contemporary Japanese culture, explanations and commentary are given through the course, and students acquire the ability to understand, in English, the characteristics of Japanese culture centering on the early modern period and to communicate them to others. Furthermore, the goal of the course is to recognize the characteristics of Japanese culture as seen from the world and to cultivate the English ability not only to recognize them but also to convey them in English. From the perspective of fostering employability, the course nurtures logical thinking skills and a broad outlook.		
Prerequisites and Notes	This course is an advanced course of “Inter-Cultural Understanding” and an advanced course in the “Society/Culture” area of English Communication.

Class Session	Class Format	Class Plan	Preparation and Review (Preview/Review, etc.)	Preparation /Review Time
Session 1	In-person	”Course Introduction: Kamigata and Edo” As an opportunity to think about the early modern period, students examine the cultural, social, and economic characteristics of Kamigata and Edo in the early modern period.	After class, carefully read the handout for Session 1 distributed in class and the notes you took in class, and review. Also read in advance the materials for Session 2 that will be posted on the Learning Portal.	4 hours
Session 2	In-person	”People (1): The Townspeople” In a status-based society, an individual’s future was determined to some extent at the time of birth. Nevertheless, the townspeople of the time devoted themselves earnestly to culture and learning. Students learn about the characteristics of townsperson culture as the background against which a highly refined townsperson culture was produced.	After class, carefully read the handout for Session 2 distributed in class and the notes you took in class, and review. Also read in advance the materials for Session 3 that will be posted on the Learning Portal.	4 hours
Session 3	In-person	”People (2): The Warrior Class” Although the samurai were the ruling class of early modern society, there were great differences between wealthy samurai at the daimyo level and lower-ranking samurai. Students learn about the characteristics of samurai households’ way of life, including how they thought about their own “reason for existence” in a peaceful era without war.	After class, carefully read the handout for Session 3 distributed in class and the notes you took in class, and review. Also read in advance the materials for Session 4 that will be posted on the Learning Portal.	4 hours

Session 5	In-person	"People (4): Women in Premodern Japan" In the early modern period, the influence of Confucianism grew stronger, women's rights and freedom were restricted, and opportunities to show individuality were extremely limited. Focusing on several patterns of life such as "women of samurai families," "women of townsperson families," and "courtesans," students also examine the influence on contemporary society.	After class, carefully read the handout for Session 5 distributed in class and the notes you took in class, and review. Also read in advance the materials for Session 6 that will be posted on the Learning Portal.	4 hours
Session 6	In-person	"People (5): Children in Premodern Japan" Even in an era without compulsory education, an educational institution called the "terakoya" spread, and many commoners' children came to be able to read and write. Students learn about the realities of this. They also examine children's play and toys in Edo.	After class, carefully read the handout for Session 6 distributed in class and the notes you took in class, and review. Also read in advance the materials for Session 7 that will be posted on the Learning Portal.	4 hours
Session 7	In-person	"Creativity (1): Ukiyoe Prints and Kusazoshi Picturebooks" Through an introduction to "ukiyo-e," which had a major influence on French Impressionism, and "kusazoshi" (picture-centered reading material) published at New Year, students learn about the creativity of people in the early modern period.	After class, carefully read the handout for Session 7 distributed in class and the notes you took in class, and review. Also read in advance the materials for Session 8 that will be posted on the Learning Portal.	4 hours
Session 8	In-person	"Creativity (2): The Kabuki Theatre" Kabuki was not merely a "play" but a common culture shared by everyone regardless of age or gender, and it occupied a position like that of television today. Students learn about popular Kabuki actors, famous works, and theatrical productions.	After class, carefully read the handout for Session 8 distributed in class and the notes you took in class, and review. Also read in advance the materials for Session 9 that will be posted on the Learning Portal.	4 hours
Session 9	In-person	"Creativity (3): The Joruri Puppet Theatre" Joruri (today's Bunraku) flourished especially in the middle of the early modern period, and there was even an era (the "golden age of Joruri") when it was more popular than Kabuki. As time went on, the techniques of puppetry and shamisen also developed, and it continues to captivate audience	After class, carefully read the handout for Session 9 distributed in class and the notes you took in class, and review. Session 10	In-person	”Creativity (4): Dutch Studies in Japan” Rangaku (“Dutch learning”) was the study of European science and technology, and Tokugawa Yoshimune encouraged it. The “Tekijuku,” which Ogata Koan opened in Osaka, was a representative Rangaku academy, and many thinkers and politicians of the Meiji period, including Fukuzawa Yukichi, studied there. Students examine the reasons why it produced such outstanding talent.	After class, carefully read the handout for Session 10 distributed in class and the notes you took in class, and review. Also read in advance the materials for Session 11 that will be posted on the Learning Portal.	4 hours
Session 11	In-person	”Creativity (5): The Tokaido and its Culture” The Tokaido is a highway running east from Kyoto along the Pacific Ocean. Students learn about the social and cultural importance of the Tokaido in the Edo period and about the ukiyo-e and publications produced by the romance of the Tokaido.	After class, carefully read the handout for Session 11 distributed in class and the notes you took in class, and review. Theme	How do we shape our life through cultural practices?		
Course Objectives and Overview	This course will be conducted in English. The course explores intercultural issues and cultural theories that allow us to understand what we (usually) unconsciously do in everyday, cultural practices and framework, including popular music. At the same time, this course introduces such concepts as “hybridity”, “cultural industry”, “postcoloniality” and “westernisation/modernisation” which enable the students to grasp the cultural interactions and acculturations occurring across “national” border. In particular, the impact of American culture during the post-war period and the acculturation of American values in the context of Japan will be investigated in the last three classes of the course.		
Prerequisites and Notes	Since this course is conducted in English, students are required to have an appropriate level of English proficiency. For example, a level equivalent at least to 550 points on the TOEIC L&R (B1 level on CEFR scale) is required. For more information on English proficiency standards, please refer to the following website: https://www.coe.int/en/web/common-european-framework-reference-languages/table-1-cefr-3.3-common-reference-levels-global-scale Note: There is a possibility of holding a fieldwork in one of the classes if all the enrolled students wish to do so. Note also that in case we do conduct fieldwork, there needs to be some preparation time in the class prior to it.		
Relation to the Diploma Policy (DP)	For the relation between this course and the Diploma Policy (DP), please refer to the following URL. https://www.keiho-u.ac.jp/faculty/taken/curriculummap.html		
Learning Outcomes	Upon the successful completion of the course, students should be able to: (1) examine everyday cultural practices within broader cultural and historical contexts by using approaches drawn from multiple academic disciplines. (2) demonstrate self-reflexive awareness of Japanese culture and evaluate its position within East Asia. (3) recognize potential challenges in intercultural interactions and propose strategies to address them.

Regarding taking this course	International migration across national borders is by no means a new phenomenon. Over the past two to three centuries, humankind has moved in search of new opportunities because of poverty, conflict, and environmental degradation. While researchers, engineers, and workers active as international migrants have spread throughout the world, conflicts and problems still arise between states and international migrants and between majorities and migrants. In this course, students understand trends in international migration in English and discuss the challenges and possibilities of the social environments in which international migrants are placed. Preparation and review are necessary to understand the specialized content. Study the assignments given in class and actively engage in discussions on migration in class.

Grade	G4	Teaching Method	Lecture
Course Category	Faculty of International Studies Specialized Courses		
Theme	Gain basic knowledge of the relationship between language and culture and consider one's relative position within society.		
Course Objectives and Overview	In this course, the relationship between language and culture is examined from multiple perspectives, with the aim of positioning individual languages and cultures relatively. As a result, by overcoming the representation of "myself as a person of such-and-such nationality" and reconstructing the concept of the self, students are expected to become able to communicate smoothly with people of various languages and cultures.		
Prerequisites and Notes	Because group work, pair work, and similar activities are carried out throughout the course, oral communication ability is required.		
Relation to the Diploma Policy (DP)	For the relation between this course and the Diploma Policy (DP), please refer to the following URL. https://www.keiho-u.ac.jp/faculty/taken/curriculummap.html		
Learning Outcomes	・To be able to explain explicitly the definition of culture and the relationship between language and culture. ・To acquire the ability to understand others with diverse backgrounds and cultural phenomena with a consistent stance and to communicate smoothly.

Regarding taking this course	The purpose of this course is the practice of intercultural exchange, and in addition to lectures, many group work, pair work, and discussion activities are carried out. Therefore, an active attitude and active speaking are expected. Through interaction with students of various roots, let us gain new perspectives by viewing the familiar “language” and “culture” from a distance.

Course Title	Tourism Resources	Academic Year	Fall Semester, AY2026
Instructor	YAMAMOTO Kunihiro	Year Level	234
Course Numbering	For course numbering, please refer to the following URL. https://www.keiho-u.ac.jp/faculty/taken/numbering.html	Credits	2 Credits
Grade	G3	Teaching Method	Lecture (On-demand)
Course Category	Faculty of International Studies Specialized Courses		
Theme	Learn the basics of “classifying and understanding,” “explaining as experience,” and “utilizing in the region” tourism resources, and acquire the ability to write reports on tourism resources correctly.		
Course Objectives and Overview	This course organizes tourism resources from the perspectives of nature, culture, food, industry, events, and so on, and studies the mechanism by which tourism resources create value as tourism experiences (resource → experience → value). In addition, building on the basics of Japanese geography and regional characteristics, transportation, policy, and business, students cultivate the ability to explain and evaluate the tourism resources of a region and even to devise simple improvement proposals. This course is conducted in on-demand format, and study proceeds through video viewing for each session, confirmation assignments (check-in assignments), a midterm confirmation test, a final test, and a final assignment (written using a template). Given that there are many enrolled students including international students, important terms are organized and presented, and emphasis is placed on practice in explaining in short texts.		
Prerequisites and Notes	(1) Basics of On-Demand Attendance View the materials for each session (videos and documents) and submit the “check-in assignment” by the designated deadline. Because submissions serve as evidence of study, manage deadlines strictly (the handling of late submissions follows instructions given in class). Communications, assignments, and submissions regarding the course are carried out on the LMS. (2) Learning Environment (Attitude toward the Course) Because this course has a large number of enrolled students, instructions and rules are made clear and applied fairly. Submissions are treated as “learning outcomes,” and if appropriation of others’ work or misconduct is suspected, they will not be recognized as learning outcomes. (3) Consideration for International Students (Language) Important terms are organized and presented every session, and simple paraphrases are given as necessary. If you are concerned about your understanding of Japanese, the use of dictionaries and translation aids is permitted. (4) Use of Generative AI (Important) Generative AI may be used for the purposes of “organizing structure, paraphrasing, polishing, and translation assistance.”		
Relation to the Diploma Policy (DP)	For the relation between this course and the Diploma Policy (DP), please refer to the following URL. https://www.keiho-u.ac.jp/faculty/taken/curriculummap.html		
Learning Outcomes	1. To be able to classify tourism resources and explain the characteristics of the resources. 2. To be able to put tourism resources into words as “experiences” and explain in short texts their value for tourists. 3. To be able to specifically cite and organize the tourism resources of a region, based on Japanese geography and regional characteristics. 4. To be able to organize issues concerning tourism resources (reception, access, congestion, etc.) and propose simple improvement measures. 5. To acquire the study habit of reading instructions, submitting by the deadline, and explaining with supporting evidence.

Theme	Students survey the history of international tourism and survey the initiatives of travelers, tourism businesses, and regions.		
Course Objectives and Overview	In the 21st century, people's movement takes place on a global scale. Because tourism has become a major pillar of the world economy, it is called the "age of international tourism." In Japan, which is entering a super-aging society, "tourism" is a growth industry attracting attention. In particular, the increase in inbound tourists since 2013 can be called astonishing. This course grasps the historical transition of international tourism and, in particular, studies inbound tourism and regional tourism, which are also expected to grow into a driving force of the Japanese economy in the future. It also approaches the phenomenon of tourism through various actual examples.

Theme	Understand hospitality and acquire the ability to practice it in daily life.		
Course Objectives and Overview	Hospitality was originally a philosophy practiced in the tourism industry, such as hotels, travel, and restaurants, but has gradually come to be adopted in all industries, centered on the service industry. What hospitality aims for is the building and maintenance of good human relationships. And practicing hospitality means acting while thinking sincerely of the other person. In this course, students understand hospitality, consider on the basis of cases what ways of thinking and what words and actions should be acquired, and engage in group work and presentations. They also practice manners that can be incorporated into daily life. The course aims to enable students to be valued in job hunting and, after becoming members of society, to be trusted by their workplaces and customers and to build good human relationships. Students also have the opportunity to learn in what situations the concept of hospitality is practiced through lectures by guest speakers who are currently active in the field.		
Prerequisites and Notes	The course is not only in lecture format; there is group work every session. Groups are shuffled by year and other attributes, and presentations are also given in the assigned groups.

Theme	World Aviation Policies and Airline Strategies in Global Competition		
Course Objectives and Overview	The purpose of this course is to acquire basic knowledge of the aviation industry. The aviation industry has developed remarkably along with the globalization of the world. The course follows the history of commercial aviation, in which, after aviation liberalization following deregulation, the rise of low-cost carriers (LCCs) began and the formation of global alliances among major airlines accelerated. Specifically, students broadly deepen their understanding of aviation business and aviation policy, airports, international air cargo, and airline management and strategy. The instructor also introduces their many years of practical experience at airlines and considers up-to-date market trends and airline strategies.

Theme	We will deepen our awareness of the relationship between tourism and the heritage that humanity should share, and consider.		
Course Objectives and Overview	This course is conducted entirely in English. Specifically, students understand the establishment and philosophy of the World Heritage system and study how World Heritage sites registered in Japan and overseas met the criteria and came to be registered. The course also clarifies the intrinsic value of each heritage site and the merits and demerits of its being developed for tourism, and examines, through various cases, how heritage sites can be sustainable tourism resources that do not lose their value into the future.

Theme	Thinking about China from Various Perspectives		
Course Objectives and Overview	In this course, students look back on the history of China from the end of the Qing dynasty to the present-day China (the People's Republic of China) and also study it from the aspects of politics and economics. The People's Republic of China is a relatively new country established in 1949. The country is also governed under the leadership of the Chinese Communist Party. It is now the world's second-largest economy, and its position is expected to be maintained or even strengthened in the future. This course is an opportunity for students to learn what kind of country China is. It also takes up its relations with Japan, the United States, and Taiwan. The course content will be adjusted as appropriate according to students' level of understanding.

Regarding taking this course	・Fully understand the grade allocation of this course. That is, understand that the comments for each class are extremely important, and attend every class. ・This course focuses on providing an overview of the United States, but one can come to know it deeply only by comparing it with other countries (for example, one's own country of origin). Therefore, do not be satisfied with merely grasping conditions in the United States; always compare with other countries and try to grasp differences and (surprisingly many) similarities.

Theme	Examine contemporary Korea from multiple perspectives.		
Course Objectives and Overview	In this course, students learn about the state of society behind familiar topics related to Korea and recent social issues, taking these as themes. In the first half, students gain an easy-to-follow overview of the geography, society, economy, and culture of contemporary Korea. In the second half, specific problems and events in Korean society are taken up, and students consider together the reasons behind them and the points worth thinking about. By studying Korean society, the course aims to enable students to think about the societies and countries in which we live from a variety of perspectives. Students will also develop the ability to consider the problems and changes facing society from a broad perspective.

Regarding taking this course	● Fourteen sessions will be held face-to-face (the 15th session will be delivered on demand). [Details of Grading Methods and Criteria] ● “Active participation and engagement in class (40%)” : Please participate actively in every class. In class, worksheets, group work, quizzes, comment sheets, presentations, discussions, and other activities will be carried out. Based on participation in these activities and the work submitted, a score out of 40 points is given for each session. The average of these scores is calculated over the 15 sessions. Even if attendance is recorded through the student ID card, if participation in class activities or submission of work cannot be confirmed, it cannot be evaluated as “participation and engagement in class.” (* Please note that if you are absent or have no submission, the score for that session will be 0 points. If you must be absent for unavoidable reasons, please submit an application for an official absence.) ● The “coursework report during the semester (30%)” is an assignment entitled “Original Wikipedia Page Introducing Korea (My Own Original Wikipedia Page Introducing Korea).” Details will be explained in class. ● Details of the “report examination (30%)” will be explained in class.

Theme	Understand the economy and society of Southeast Asia in the contemporary era.		
Course Objectives and Overview	This course focuses on the economy and society of Southeast Asia in the contemporary era. In the first half of the course, students learn about the process of economic development in the Southeast Asian countries up to the present. First, we look back on the era of catch-up industrialization from the 1980s to the 1990s. Second, we study the major changes and challenges in the Southeast Asian economies in the post-catch-up era, from the 2000s to the present. In the second half of the course, taking into account that economic activities in Southeast Asian countries are carried out across national borders, students examine various contemporary economic and social phenomena in the region. Specifically, students learn about the challenges posed by social changes such as the disparities brought about by economic change, urbanization, environmental destruction, and the declining birthrate and aging population.

Theme	Japan's Development Cooperation: With a Focus on the Asia-Pacific Region		
Course Objectives and Overview	This course examines Japan's development cooperation, which has made a major contribution to the economic and social development of the countries of the Asia-Pacific region from the postwar period to the present. Development cooperation is assistance provided to address development issues in many fields in developing countries, such as human resource development, infrastructure improvement, natural disasters, environmental problems, and peacebuilding, and its core is ODA (Official Development Assistance). Specific methods of ODA assistance include yen loans, technical cooperation, and grant aid. This course focuses on the Asia-Pacific region, including the small island countries of the Pacific, and examines (1) the historical background and characteristics of Japan's ODA, and (2) how ODA has contributed to the economic development and sustainable development of developing countries. In addition to the above, the course also touches on the roles of international organizations, local governments, companies, and NGOs/NPOs involved in Japan's ODA, as well as the activities of the Japan Overseas Cooperation Volunteers, in which young Japanese people participate and which are highly regarded by developing countries.		
Prerequisites and Notes

Regarding taking this course	This course focuses in particular on the Asia-Pacific region, but when people hear “the Asia-Pacific region,” few of them probably think of the small island countries of the Pacific. A concept common to the 17 goals of the SDGs (Sustainable Development Goals) is “leaving no one behind” (No one left behind). According to this concept, even in development cooperation, we must not overlook the existence of these small island countries. With this in mind, this course would like to shine a spotlight on these countries as well. Without forgetting such seemingly small presences, let us think together about development cooperation from a broad perspective!

Theme	Studying International Relations in the Asia-Pacific Region		
Course Objectives and Overview	This course systematically examines the political, diplomatic, and security-related confrontation, competition, and cooperation in the postwar Asia-Pacific region, and studies the background against which the Asia-Pacific region was formed as a political concept, as well as the factors behind the recent emergence of regional concepts that are replacing the Asia-Pacific (such as the Indo-Pacific). The Asia-Pacific region in the twenty-first century is becoming a central presence in international relations. In this politically constructed region, there coexist not only competition among major military and economic powers but also cooperation among countries with diverse cultures and religions. In order to seek stability and coexistence in the Asia-Pacific region in the years ahead, let us study together the history and present state of the region to date.		
Prerequisites and Notes	・It is recommended (though not required) that you take this course together with courses in international relations and international politics, such as International Relations and Political Geography. ・This course is strongly recommended for those who aim to enter graduate school in international relations or international politics. ・There is no “correct answer” to the content of this course. Students who analyze a variety of information objectively and are willing to listen to opinions that differ from their own will be highly evaluated. ・If you come across a news article related to what you have learned in class, please write down the main points of the news and your own opinion in your notebook. It will certainly be useful when you are job-hunting.

Theme	Toward Asia's Environmental Problems and Sustainable Development		
Course Objectives and Overview	Around the world, the effects of climate change are appearing, such as the observation of extreme weather including torrential rains and powerful typhoons. In addition, air pollution not only affects health but also affects ecosystems and buildings, and, together with climate change, is a global-scale problem. In Asia, where economic growth is accelerating, it is thought that if people raise their consumption levels with the mass-consumption, mass-production lifestyle of today's developed countries, both climate change and air pollution will continue to worsen. In order to reduce the rapidly increasing emissions of greenhouse gases in Asia and to improve air pollution, it is necessary for the whole world, including the Asian countries, to cooperate in advancing countermeasures. The purpose of this course is to understand the environmental problems brought about by such economic growth in Asia and to consider sustainable development.

Theme	Consider climate change and biodiversity from the perspectives of international relations, economics, and business.		
Course Objectives and Overview	Students organize the global issues that the Sustainable Development Goals (SDGs) aim to resolve from the perspectives of “economy,” “society,” and “environment,” which international relations, international economics, and international business share as common objects of study, and learn from an interdisciplinary perspective, while deepening their understanding from multilayered perspectives, including the domestic, local, and global levels. In addition, through lectures by guest speakers, students learn concretely how diverse actors (states, international organizations, civil society, corporate sectors, etc.) are working toward the achievement of the SDGs.		
Prerequisites and Notes	In addition to this course, “Special Lectures on SDGs A” (Environment), there are two other courses, “Special Lectures on SDGs B” and “Special Lectures on SDGs C” (Society and Economy), making three courses in all, and through these three courses students learn about the global issues indicated by the 17 goals. Under the graduation requirements, Special Lectures on SDGs is an elective-required subject, so please take at least one of the three courses.		
Relation to the Diploma Policy (DP)	For the relation between this course and the Diploma Policy (DP), please refer to the following URL. https://www.keiho-u.ac.jp/faculty/taken/curriculummap.html		
Learning Outcomes	① Be able to explain what the climate change problem and the biodiversity problem are. ② Understand and be able to explain what the key points are, from the perspectives of international economics and international relations, regarding climate change and biodiversity. ③ Acquire knowledge of how governments, companies, and civil society are addressing the challenges of climate change and biodiversity, and be able to explain an outline of these efforts.

Theme	Where Do Differences in Political Systems Come From, and What Do They Produce?		
Course Objectives and Overview	When following international news in recent years, many questions of the kind "Why does such a thing happen?" will probably arise. Various factors lie behind them, such as politics, economics, religion, and geography; in this course, by learning about the commonalities and differences in the political systems of specific countries, we will deepen our consideration of that question. In order to understand political systems, an understanding of economics and culture is also indispensable. Moreover, understanding these is essential for going out into the world of the future, in which people are connected across national borders. It is impossible to take up every country and political system, but in this course we will approach the subject from specific contexts, using Asian countries that have deep ties with Japan and other countries as examples. Let us learn comparative politics together through real problems that are occurring right now in today's turbulent international community.

Regarding taking this course	・In this course we plan to deal with a variety of countries and regions. The amount of information will probably be large, but you are not expected to memorize all of the lecture content. Please attend each lecture with concentration, understand it, think for yourself, and develop the ability to put your thoughts into words. ・Review is carried out mainly through the writing of short reports. You will be asked to organize and consider, centered on keywords, content that you can understand if you attend the lectures normally. ・Since the aim is to understand the real world, following the news on a daily basis will deepen your understanding of the lectures and will also lead to practical learning. ・The countries and regions covered may be changed according to students' level of understanding and interests, so we welcome active comments, whether on points you do not understand or on things you have understood or found interesting.

Theme	Studying International Relations from a Theoretical Analytical Perspective		
Course Objectives and Overview	The aim of this course is to analyze recent international relations from a theoretical perspective. Today's international situation is extremely confused. Transboundary issues that humankind must address are piling up, including war, pandemics, genocide, economic crises, and humanitarian crises. These are by no means someone else's problem and may even threaten our own social lives. However, the cluster of problems facing the contemporary world did not in fact begin only now but are problems that have occurred in various places since long ago. In order to find the common causes and regularities of those problems, humankind has brought together its wisdom (that is, theory) and established the academic field of international relations. By using theory, we can infer and verify the causes that have given rise to international problems, even from fragmentary information. In this course, we survey the findings of international relations based on the latest theories and, while touching on past and present international problems (the Russia-Ukraine war, the Middle East crisis, the Asian currency crisis, global warming, etc.), discuss and examine the effectiveness and future of theory together with the students.		
Prerequisites and Notes	・No enrollment requirements are set, but it is desirable to have background knowledge at the level of high school world history. ・Reflecting recent trends in international relations, this course develops lessons based on middle-range theories that provide answers to individual, concrete problems. Traditional general theories (such as realism) will not be covered in any major way, so it is desirable to supplement them on your own. ・In this course, statistical data is sometimes used as material. It will be explained carefully in class, but please become familiar with numerical information in advance. ・Students who wish to go on to graduate school in international relations are also very welcome to take this course. ・Those who wish to consult with the instructor should email separately.		
Relation to the Diploma Policy (DP)	For the relation between this course and the Diploma Policy (DP), please refer to the following URL. https://www.keiho-u.ac.jp/faculty/taken/curriculummap.html		
Learning Outcomes	・Understand and explain important concepts and theories concerning international relations. ・Present real international problems as puzzles that run counter to theory (anti-theoretical questions), and further be able to explain them by applying theory. ・Become able to make effective policy proposals, grounded in theory, for resolving international problems.		
Correspondence to Qualifications and Certification Exams			
Method of Feedback	・Questions are collected from students using comment cards, and answers and comments to the questions are given from the following week onward. ・Time for questions and answers is set aside during and after class. ・Where necessary, supplementary materials are distributed (or made available on the Learning Portal), and reference materials and literature are introduced.

Theme	Who Decides and Implements a State's Foreign Policy, for What Purpose, and How?		
Course Objectives and Overview	The aim of this course is to understand the mechanisms by which a state's foreign policy is formed and implemented. In international politics, the state is regarded as the most fundamental actor and is an object of observation and analysis. Furthermore, the state is thought to pursue its national interest rationally and to cooperate or conflict with other states; in the real world, however, there is no such actor as "the state." The ones who decide and implement a state's foreign policy are always human beings, and organizations composed of human beings. Since they are human beings, there are times when they act rationally and times when they do not. And there are both differences and many commonalities between the activities of human beings and those of organizations composed of human beings. While remaining conscious of the state as a unit, this course also pays attention to organizations composed of human beings, and we will discuss with you the mechanisms by which foreign policy is formed and implemented. In the second half of the course, we will analyze the foreign policies of the United States, Japan, and China, which influence the order of the Asia-Pacific region, as cases. In addition, we plan to introduce current affairs in the Asia-Pacific region during class. The content may be adjusted according to the level of understanding of the students enrolled.

Theme	Exploring the Interface between International Politics and Geography from the Perspective of Geopolitics		
Course Objectives and Overview	The aim of this course is to learn how to understand international politics from the perspective of geography and space. You have surely heard the word “geopolitics” somewhere. “Geopolitics,” which we ordinarily use without thinking deeply, actually has interpretations and analyses from various standpoints. To simplify to an extreme, geopolitics is a discipline that explains the exercise of power and the distribution of interests from the perspective of geography and space. By grasping flat international politics in three dimensions, geopolitics sometimes provides simple and clear answers that explain conflicts and confrontations, and it is also sometimes used as a tool for arbitrarily explaining the validity of policies and strategies. This course provides a place for you to learn about and discuss the history, theories, and methods of geopolitics. Specifically, in the first half of the course the instructor gives lectures based on the content of textbooks and reference books. In the second half, the students analyze global problems from the analytical perspective of geopolitics and give presentations and hold discussions. The selection of cases and the order of presentations will be decided in consultation with you during class.

Theme	Acquire Basic Knowledge of International Law and Make Sense of News in Japan and the World.		
Course Objectives and Overview	This course is a general-introduction course on international law that follows “International Society and Law,” a course in which students learn basic knowledge of international law. Students acquire knowledge of the rules concerning the state, which is the foundation of international law; land, sea, air, outer space, and so on; international organizations; international crimes; the international economy; the international environment; armed conflict; and the like. On that basis, as an application of this basic knowledge, specific examples in particular countries and regions are taken up. In this way, students consider the interpretation, application, and remedies of law in a practical and flexible manner that gives first priority to problem-solving.

Theme	Consider security in the international community from a theoretical aspect.		
Course Objectives and Overview	In the contemporary international community, armed conflicts (so-called armed conflict) still occur frequently, and as a result various social problems such as nuclear proliferation, refugees, poverty, and humanitarian crises continue to be produced. This course considers why armed conflicts and issues related to armed conflict occur. Of course, there are diverse ways of thinking about this, but this course emphasizes theory. A theory is a discourse that specifies the causes of various phenomena. By using theory, it is possible to discuss themes such as “Why does war occur?” and “Could war occur in the near future?” with a high degree of precision. In this course, we first explain the causes of war between states (interstate war), the most typical form of armed conflict, using the latest theories. Furthermore, students learn the theories of deterrence, alliances, and nuclear weapons, which are elements for deepening the understanding of interstate war. Next, we also explain from a theoretical perspective war within states (civil war), which has become prominent in recent years. Because civil wars involve not only the fighting itself among combatants but also unarmed citizens, humanitarian crises such as terrorism, massacres, and mass rape are likely to occur. The course also explains theories that predict the occurrence of such humanitarian crises. Finally, this course places the highest priority on active discussion and the exchange of ideas among students. For that reason, participants form groups in class and conduct research, throughout the course period, to answer a research question set by the group (group work). At the end of the course, each group gives a presentation and shares its research results, aiming at mutual learning among the participants.		
Prerequisites and Notes	・Although not required, it is desirable to have taken “International Relations,” offered in the first semester. ・Although not required, quantitative data may be presented in class, so please become familiar with information in that form.		
Relation to the Diploma Policy (DP)	For the relation between this course and the Diploma Policy (DP), please refer to the following URL. https://www.keiho-u.ac.jp/faculty/taken/curriculummap.html		
Learning Outcomes	・Become able to understand and explain, using theory, the causes and effects of war and the various phenomena related to war. ・Become able to verify the theories introduced in class by finding data yourself. ・Become able to predict future outbreaks of conflict to some extent on the basis of theory and to make policy recommendations based on that.

Theme	Thinking About the "Whys" in Our Lives from the Perspective of International Human Rights Law		
Course Objectives and Overview	When you hear "human rights," what comes to mind? Few people can answer this question easily. In this course, we will unravel human rights violations in Japan (particularly against minorities) from the perspective of international human rights. In the early part of the course, we explain an overview of international human rights law, including basic knowledge related to international human rights law and the relationship between international human rights law and Japan. The latter half of the course consists of specific topics, which we examine through the lens of international human rights, focusing mainly on Indigenous peoples (the Ainu people and the people of Ryukyu/Okinawa), migrants and refugees, children, women, and persons with disabilities. Things we usually resign ourselves to as unavoidable may in fact violate international rules. The aim of this course is to understand human rights issues in Japan from the perspective of international human rights law, such as human rights treaties. To that end, we plan to encourage active discussion in class and to have students select themes of interest and give group presentations. Through this course, we hope that you will take a step forward in response to the human rights situations that you find questionable.		
Prerequisites and Notes	If you require special consideration in order to take this course, please consult the instructor in advance. If you require reasonable accommodation because of a disability (including intractable diseases and chronic illnesses), please refer to the university's Support for Students with Disabilities (https://www.keiho-u.ac.jp/life/support/barrierfree.html) and consult with us.		
Relation to the Diploma Policy (DP)	For the relation between this course and the Diploma Policy (DP), please refer to the following URL. https://www.keiho-u.ac.jp/faculty/taken/curriculummap.html		
Learning Outcomes	The goal of this course is to learn the norms and institutions that have been built to resolve issues in international human rights law and to acquire the flexible, problem-solving way of thinking necessary for career formation in the international community. Students learn what international human rights norms have been formed and what institutions have been established in fields that require international cooperative frameworks, and understand the possibilities and limits of using these in combination to resolve issues.		
Correspondence to Qualifications and Certification Exams			
Method of Feedback	From Session 4 onward, students who have chosen the chapter of a theme of interest give a summary of that chapter for about 10 minutes at the start of class. A discussant is decided in advance for the report and prepares questions (about 10 minutes). After that, a lecture including points that were lacking or need to be added is given (about 60 minutes). In the final 10 minutes or so, students write a reaction paper every week, and the questions are answered the following week.

Regarding taking this course	The international community is composed of approximately 200 countries and regions that are extremely diverse in history, culture, institutions, and other respects (incidentally, from Japan's standpoint, 196 states exist on Earth). On the other hand, what governs this international community is universal law (rules). We hope that you will gain the "awareness" that leads to your future specialized study and overseas experience and study abroad through the dynamic movements that arise between universal rules and the diverse countries and regions.

Theme	Acquire Basic Knowledge of Taxation and Consider a Fairer and More Optimal Tax System		
Course Objectives and Overview	The tax system is an indispensable institution that exists as part of the fiscal system through which a state procures, manages, and uses the financial resources necessary to carry out various activities such as politics, economy, diplomacy, and education. Because the history, culture, and political and economic development of each country differ, tax systems also take various forms. The purpose of this course is to learn basic ideas and knowledge concerning taxation and to deepen understanding of Japan's tax system through comparison of the tax systems and tax policies of Japan and other countries. Specifically, in addition to the basic principles concerning taxation, such as fairness, neutrality, and simplicity, students compare across countries the tax systems and tax policies of major Asian countries including Japan and the OECD member countries, thereby identifying the problems of the existing tax systems in Japan and other countries (in particular, individual income tax and consumption tax) and developing the ability to consider appropriate tax systems suited to the social conditions of each country. Another purpose is to acquire multifaceted powers of observation and the ability to understand the societies of major Asian countries.

Theme	Realizing a Multicultural Coexistence Society Challenges for Global Citizens: Considering the Aging Society and Care Economy, Fast Fashion, and Climate Change through Local Government		
Course Objectives and Overview	Japan accepts as many as 3.22 million foreign nationals (as of June 2023) without having established a system for accepting immigrants, and the Ministry of Internal Affairs and Communications is also requesting local governments to formulate guidelines for multicultural coexistence with residents of foreign nationality. 1. While touching on the history of the human rights movement of Zainichi Koreans and Japan's 1982 ratification of the Refugee Convention, we examine recent issues such as ensuring Japanese-language and mother-tongue education for children of foreign nationality and administrative measures for multicultural coexistence. 2. As a local-government version of ODA, cooperation between cities in the fields of waste separation, water supply and sewerage technology, transportation, and the environment is carried out across national borders, and students learn its significance as a new form of international cooperation. 3. Consider the aging society, fast fashion, and climate change from the standpoint of a global citizen.

Regarding taking this course	An omnibus course coordinated by SUGAWARA of the Faculty of International Studies, with guest lectures by Mr. NISHIWAKI Kunio (former member of the Osaka Prefectural Assembly) and Mr. KANATANI Ichiro (formerly a ward head of the City of Osaka); Mr. Nishiwaki and Mr. Kanatani each convey their activities in the field in practical lessons. Japan, too, was once a nation of emigrants. From Okinawa alone, 160,000 people emigrated to Brazil and Peru and built Nikkei (Japanese descendant) communities. Along with learning from past history, we hope that you will also take an interest in the multicultural coexistence measures undertaken by local governments and in the international cooperation initiatives known as local-government ODA. Acquiring the way of thinking of multicultural coexistence also cultivates a human rights sensibility that meets international standards.

Let us also understand JICA, which plays a central role. The SDGs established by the United Nations include the goal of safe water and toilets for all the world. Students learn the history and mechanisms of waterworks and of sewerage, which is not well known.	Preparation (2 hours): Research local-government ODA initiatives on the website of Kitakyushu City. Review (2 hours): Understand, from the distributed materials, the mechanisms of Kitakyushu City's waterworks project in Hai Phong City, Vietnam, and its waste separation and recycling project in Surabaya, Indonesia.	4 hours
Session 11	In-person	Waste Is a Treasure: Learning from Waste-to-Energy and Zero-Waste Towns (SUGAWARA Emi) Guest speaker: Mr. NISHIWAKI Kunio Japan is one of the countries in the world that burns and disposes of the most waste. After the war, however, incineration facilities could not keep up, and the method was to dig holes in the ground and bury the waste. Many incineration facilities were built, but in Tokyo, where the population had grown too much, in the 1960-70s, a "garbage war" broke out. Today, however, towns with zero waste have emerged. Also, waste is a treasure, producing electricity and resources. How is waste handled in your region?	Preparation (2 hours): Research Tokyo's garbage war, the Maishima waste incineration facility in Osaka City, and Kamikatsu Town's Zero Waste Declaration on the web, and research the waste disposal system of the local government where you live. Review (2 hours): Japan's waste disposal has also progressed from landfill to incineration, then to separation and recycling, and further to waste reduction. Understand the mechanisms from the distributed materials.	4 hours

Theme	This course is a special lecture organized in an omnibus format, inviting guest speakers from various fields.		
Course Objectives and Overview	This lecture takes “the movement of people” as its starting point, and aims to consider the possibilities of an Asian community from a global perspective after understanding diversity and multicultural coexistence in the Asian region. Specifically, we first examine theoretically how “the movement of people” in multicultural coexistence affects the Asian community and how this relates to Japan. Next, we deepen discussion of diversity in Asia, using cases from neighboring regions as clues. In addition, from an interdisciplinary perspective, we explore the nature of sustainable multicultural coexistence and conceive a model of sustainable multicultural coexistence in Asia. Finally, from a global perspective, we incorporate the insights of scholars from other countries and examine the past, present, and future of the Asian community from multifaceted fields.		
Prerequisites and Notes	・Because evaluation is based on comments on the class submitted each time using comment sheets and the like, students must, in principle, attend all classes, except where there is an unavoidable reason (such as an official absence). ・Depending on the circumstances of the guest speakers, the lecturer or the order of the lectures may change. In that case, advance notice will be given.		
Relation to the Diploma Policy (DP)	For the relation between this course and the Diploma Policy (DP), please refer to the following URL. https://www.keiho-u.ac.jp/faculty/taken/curriculummap.html		
Learning Outcomes	1. Perspective of Knowledge and Skills Through this course, students can learn and understand diversity and multicultural coexistence, centered on “the movement of people” in the Asian region. 2. Perspective of Thinking, Judgment, Expression, etc. Based on interdisciplinary and global perspectives, students can envision the past, present, and future of Asia critically and creatively and express their own ideas logically. 3. Perspective of Proactive Attitude Students can engage actively in their studies and participate proactively in class.

Theme	Clarify the economic and social problems related to poverty in developing countries, and consider what measures should be taken to achieve economic development		
Course Objectives and Overview	The purpose of this course is to understand the social and economic problems that cause poverty in developing countries and to acquire the basic knowledge needed to consider solutions to them. Each lecture proceeds in accordance with the course plan for that session, but may be changed as appropriate according to students' prior knowledge and level of understanding.		
Prerequisites and Notes	This course is conducted face-to-face. You are required to do the following post-class study. ・After class, review by rereading the lecture materials many times (at least 30 minutes) (*1) ・Respond to the questionnaire (*2) on that session's lecture content (approximately 5 minutes) ・Take the quiz (*3) on the previous session's lecture content (approximately 15 minutes) * 1 The lecture materials for each session are 4-8 A4 pages in Japanese. Even for those who can read Japanese text fluently, it is expected to take about 30 minutes, and for those who are not proficient in Japanese, two hours or more. * 2 The questionnaire is filled in at the end of the test on the "Learning Portal." Responses to the questionnaire must not be "I understood" or "I did not understand" but must be specific descriptions corresponding to that session's class. * 3 The test results, including the questionnaire, account for 60 points out of the 100 points of the grade evaluation. Since there are 15 classes, the points added by the test for each session are about 4 points. In other words, earning good results on the test every session is a condition for passing.

Theme	Learning about Economic Trends in Japan and Abroad and Their Background in English.		
Course Objectives and Overview	In this course, students learn about economic trends in Japan and abroad and their background in English. Specifically, students come to understand in English the meanings of basic economic terms encountered in daily life, including “prices,” “employment,” “consumption and saving,” “investment,” “financial institutions,” and “foreign exchange.” While acquiring basic economic terms in English in this way, students also learn in English about familiar economic phenomena occurring in Japan and abroad that are related to them and their background. In class, students learn not only about the various economic phenomena occurring within Japan, taking Japan as a case, but also about economic trends in the region and the world, broadening their perspective to Asia and the world.		
Prerequisites and Notes	(Enrollment requirement): As a requirement for taking this course, students must have English proficiency of TOEIC 600 or above, or equivalent English proficiency (for example, being able to read and understand an English online news article of about 400 words on an economic topic and to concisely write a summary of it in English in about three lines). If you are unsure whether you meet this requirement, please consult the instructor in the first class.		
Relation to the Diploma Policy (DP)	For the relation between this course and the Diploma Policy (DP), please refer to the following URL. https://www.keiho-u.ac.jp/faculty/taken/curriculummap.html		
Learning Outcomes	The main learning goals of this course are as follows. 1. Understand the meanings of basic economic terms and be able to explain their meanings concisely in English. 2. Accurately understand and create economics-related charts and tables in English. 3. Understand the economic trends in Japan and their background that are encountered in daily life, and be able to explain an outline of them in English. 4. Applying the Japanese case, investigate and analyze economic trends and their background in your own country, compile the results in a report (about 400 words in English), and be able to explain them in English. 5. Investigate and analyze economic trends and their background in an Asian region or the world that interests you, compile the results in a report (about 800 characters in English), and be able to explain them in English.		
Correspondence to Qualifications and Certification Exams			
Method of Feedback	On the assigned topics given in class, students conduct research and analysis, prepare English summaries of the research and analysis results, and give English presentations (including Q&A and discussion). Through this process, students improve their English ability. In addition, they deepen their understanding of the economic topics learned in class and broaden their perspectives on the topics by listening to the presentations of other students.

Class Session	Class Format	Class Plan	Preparation and Review (Preview/Review, etc.)	Preparation /Review Time
Session 1	In-person	Introduction and Setting Learning Goals The outline of the course and how it will proceed are explained. Through accounts from student assistants of their goals for the spring semester and so on, students learn how to set concrete goals by backcasting. Students confirm what and how much they must learn in one semester and create a weekly time schedule.	Review: Keeping the four years in view, assume goals for each year, and then set realistic goals for the year and, further, for the spring semester.	2 hours
Session 2	In-person	Building the Foundations for Study at University An explanation is given on study abroad and experiential courses in the Faculty of International Studies and on course selection from the second year onward. An explanation is given on grading at the university and how to read the syllabus. Through icebreaking activities, students build good relationships in the class and enhance collaboration.	Review: Consult with your parents or guardians as well, and consider how to select your course from the second year onward. Review: After class, review by reading the materials distributed in class.	2 hours
Session 3	In-person	Introduction and Setting Learning Goals; Building the Foundations for Study at University A comprehensive review of the content of Sessions 1 and 2 is carried out and feedback is given.	Review: Create class comments on what was learned in the Foundation Seminar and submit them.	6 hours
Session 4	In-person	Organizing Notes (Chapter 3) ○ On the premise of BYOD (use of PCs), students become able to take and compile notes (actively jotting down and organizing important points), rather than learning how to write in a notebook. ○ Group work is carried out, such as confirming the points that each person thought were important. Class Session	Class Format	Class Plan	Preparation and Review (Preview/Review, etc.)	Preparation /Review Time
Session 1	In-person	Introduction and Setting Learning Goals The outline of the course and how it will proceed are explained. Through accounts from student assistants of their goals for the spring semester and so on, students learn how to set concrete goals by backcasting. Students confirm what and how much they must learn in one semester and create a weekly time schedule.	Review: Keeping the four years in view, assume goals for each year, and then set realistic goals for the year and, further, for the spring semester.	2 hours
Session 2	In-person	Building the Foundations for Study at University An explanation is given on study abroad and experiential courses in the Faculty of International Studies and on course selection from the second year onward. An explanation is given on grading at the university and how to read the syllabus. Through icebreaking activities, students build good relationships in the class and enhance collaboration.	Review: Consult with your parents or guardians as well, and consider how to select your course from the second year onward. Review: After class, review by reading the materials distributed in class.	2 hours
Session 3	In-person	Introduction and Setting Learning Goals; Building the Foundations for Study at University A comprehensive review of the content of Sessions 1 and 2 is carried out and feedback is given.	Review: Create class comments on what was learned in the Foundation Seminar and submit them.	6 hours
Session 4	In-person	Organizing Notes (Chapter 3) ○ On the premise of BYOD (use of PCs), students become able to take and compile notes (actively jotting down and organizing important points), rather than learning how to write in a notebook. ○ Group work is carried out, such as confirming the points that each person thought were important.	Preparation: Read the assigned literature in advance. Review: Create class comments on what was learned in the Foundation Seminar and submit them.	6 hours

Regarding taking this course	The theme of learning in the second year of the Faculty of International Studies is “Knowing Broadly.” Going a step beyond the first year, which raises interest in and concern for the world, students are expected to broaden the scope of their own knowledge of the world. To this end, students are asked to keep “knowing broadly” in mind when setting themes within the seminar. A proactive attitude of broadening the scope of one’s own knowledge on one’s own is important.

Regarding taking this course	The theme of learning in the second year of the Faculty of International Studies is “Knowing Broadly.” Going a step beyond the first year, which raises interest in and concern for the world, students are expected to broaden the scope of their own knowledge of the world. To this end, students are asked to keep “knowing broadly” in mind when setting themes within the seminar. A proactive attitude of broadening the scope of one’s own knowledge on one’s own is important.

Regarding taking this course	The theme of learning in the second year of the Faculty of International Studies is “Knowing Broadly.” Going a step beyond the first year, which raises interest in and concern for the world, students are expected to broaden the scope of their own knowledge of the world. To this end, students are asked to keep “knowing broadly” in mind when setting themes within the seminar. A proactive attitude of broadening the scope of one’s own knowledge on one’s own is important.	

Class Session	Class Format	Class Plan	Preparation and Review (Preview/Review, etc.)	Preparation /Review Time
Session 1	In-person	Introduction Self-introductions by the instructor and students; icebreaking activities. The outline of the course, including its purposes, goals, and how it proceeds, is explained.	After class, read the materials distributed in class to review.	4 hours
Session 2	In-person	What Is Group Reading (Rindoku)? (1) The instructor designates one chapter of an introductory book, and students engage in group reading. While the instructor explains the content as appropriate, students learn how to do group reading. Students also learn about the differences from close reading. Students are divided into groups in preparation for the practice of group reading that begins next week.	Read the part of the textbook designated by the instructor and look up any words you do not understand. Then work on the assignment and report on it in the next class.	4 hours
Session 3	In-person	What Is Group Reading (Rindoku)? (2) In groups, read the part of the introductory book designated by the instructor. Course Category	Faculty of International Studies Specialized Courses		
Theme	Learn the Theory and Reality of International Politics		
Course Objectives and Overview	In this seminar, students analyze various international problems from the perspective of international politics and learn about the past, present, and future of the international community. The central object of analysis in the seminar is international relations in the Asia-Pacific region, but international issues in other regions and in new domains (such as cybersecurity) are also covered. International politics, especially international relations in East Asia, is deeply connected to our lives. In today's world, where globalization is deepening, not only the activities of public institutions and companies but also the safety and security of each of us as individuals are affected by changes in the international situation. It is extremely important to know about current affairs occurring day by day, but merely obtaining information does not enable one to understand international politics. In this seminar, enrolled students read specialized books and collections of papers on international politics and, through repeated discussion, learn knowledge related to international politics while also mastering the analytical methods of international politics. The content may be adjusted according to the level of understanding and the requests of enrolled students.

Theme	Study politics, economics, and society from the perspective of global history.		
Course Objectives and Overview	The purpose of this course is to carry out comprehensive study in which the knowledge and theories about politics, economics, and society learned in previous seminars, lectures, overseas experience courses, and other courses are analyzed and examined critically and rigorously from the perspective of global history. Specifically, there are the following two points. ① Through group reading of basic materials and other activities, hone the abilities in text decoding, comprehension, issue discovery, and presentation expected of a third-year student. ②Investigate and analyze themes related to politics, economics, and society from the perspective of global history. In addition, through discussion among the instructor and enrolled students, deepen understanding of the content of the investigation and analysis and consolidate what has been learned.		
Prerequisites and Notes	Only “motivation.”		
Relation to the Diploma Policy (DP)	For the relation between this course and the Diploma Policy (DP), please refer to the following URL. https://www.keiho-u.ac.jp/faculty/taken/curriculummap.html		
Learning Outcomes	① Following “Specialized Seminar I,” the purpose of this course is to narrow down and deepen the consideration of each student’s research theme, with the aim of participating in the Student Research Presentation Conference in the fall semester and completing the graduation research in the next academic year. ② Improve basic academic skills such as decoding materials, discovering and conceiving themes, methods of analysis and argumentation, and handling of materials, and then go beyond oral presentation to summarize one’s own learning outcomes and thoughts in logical writing. ③ Through group work, aim to further improve communication skills, collaboration, leadership, and other fundamental competencies for working persons.

Theme	Study Japanese culture and comparative culture.		
Course Objectives and Overview	In the present age, global society is advancing, and exchanges across national borders are increasing year by year. For those who will work in Japanese workplaces in the future, it is a very important task to understand the characteristics of Japanese culture more deeply and to explain them to foreigners in English. In this seminar, we will think about the characteristics of Japanese culture. We will think about them more deeply, taking into view not only present-day cultural phenomena but also the culture of pre-modern periods. In addition, from the perspective of international collaborative learning, we will make comparisons with the cultures of other countries (or one's own country). This seminar is conducted mainly in English. As teaching materials, students will closely read passages from literature on Japanese culture, and pair work, group work, student presentations, and other activities will be conducted in English. Through study and practice in this seminar, we hope that you will also build the strong "intercultural understanding ability" required in today's workplaces.

Learning Outcomes	In the first half of the class, each enrolled student gives an explanation based on materials on Japanese culture and comparative culture. In the second half of the class, students divide into groups, conduct research on a specific theme, and compile the content toward the presentation. Through group activities such as group discussions, students acquire independence, teamwork, leadership, and other qualities.

Theme	Understanding Contemporary Korean Society and Culture through Comparison and Questions		
Course Objectives and Overview	In this seminar, taking contemporary Korean society and culture as the main case, we examine the cultural and social backgrounds that shape the behaviors and values we take for granted in everyday life. Through concrete examples from Korean society, the aim is to acquire a perspective for comparing and relativizing cultures and to learn "methods of area studies." In class, using "61 Chapters for Understanding Contemporary Korea" (Akashi Shoten, 2024) as the textbook, students read literature on diverse themes such as politics, economy, society, and culture, and hold discussions. In addition, through comparison with their own life experiences and the countries and regions where they grew up, students cultivate an attitude of mutual understanding. This seminar is not centered on lectures but emphasizes active learning through reading, writing, and speaking. Through reading of literature, short reports, presentations, and discussions, students develop the ability to formulate questions, examine them on the basis of evidence, and convey their findings to others.		
Prerequisites and Notes	Please participate actively in every class. This seminar emphasizes the independent learning of enrolled students, and students practice selecting materials related to their respective themes, reading them, and explaining them in their own words. Even if you find this difficult at first, we expect that you will gradually become accustomed to it by participating with the awareness that you are "practicing." Group work, presentations, announcements, discussions, and other activities will also be conducted.		
Relation to the Diploma Policy (DP)	For the relation between this course and the Diploma Policy (DP), please refer to the following URL. https://www.keiho-u.ac.jp/faculty/taken/curriculummap.html		
Learning Outcomes	Through taking this seminar, the goal is for enrolled students to acquire the following abilities. 1. Acquire basic knowledge of contemporary Korean society and culture, and be able to explain cultural and social phenomena on the basis of concrete examples. 2. While comparing with the culture of one's own daily life and of the country or region where one grew up, be able to relativize culture, and to formulate questions and examine them. 3. Be able to read literature appropriately, compile one's own thoughts in writing or presentations on the basis of evidence, and convey them to others.

Method of Feedback	For group research and presentations, in addition to comments and advice for improvement from the instructor, mutual evaluation and peer review among group members are carried out. Regarding taking this course	In this seminar, students practice actively reading materials, explaining their content in their own words, and putting their thoughts into words. In addition to deepening knowledge of contemporary Korean society and culture, importance is placed on investigating and comparing the region or country where one grew up. In addition, by considering what “culture” is and under what historical and social backgrounds culture has been formed, students deepen their understanding of different cultures. Presentations and discussions are positioned as places for practice, so please participate actively and deepen your learning.

Theme	Examine Globalization and Culture Based on Knowledge and Theories of Intercultural Understanding, International Relations, International Cultural Studies, and International Sociology		
Course Objectives and Overview	In this course, using intercultural understanding, international relations, and international cultural studies as clues, students acquire methods of analysis and knowledge regarding migration, identity, inequality, and other topics, and at the same time engage in investigation and research using sociological methods. The purpose is also to learn the series of processes from setting one's own theme, researching materials, and analysis to presenting the research results. Enrolled students set themes based on their own interest in issues and strengthen their output ability and logical thinking ability through presentations and discussions. Through group work, they also acquire communication skills, collaboration and leadership, issue-discovery ability, and so on.		
Prerequisites and Notes	"Seminar courses" are courses of comprehensive learning in which knowledge and theories learned in lecture courses and other courses are applied to the various issues of global society for analysis and examination. Students conduct investigation and research on specific themes according to their own interests and concerns, and through this process acquire an attitude and orientation of acting proactively, with the aim of improving creative thinking. In seminars, experiential learning and active learning are actively incorporated to cultivate "international collaboration skills" such as independence, teamwork, leadership, and initiative. "Seminar courses" are allocated as "Foundation Seminar A" and "Foundation Seminar B" in the first year, "Specialized Seminar I A" and "Specialized Seminar I B" in the second year, "Specialized Seminar II A" and "Specialized Seminar II B" in the third year, and "Specialized Seminar III A" and "Specialized Seminar III B" in the fourth year, and while emphasizing the improvement of the abilities required of global human resources, course registration guidance and career guidance are also provided, and students ultimately write a graduation thesis.		
Relation to the Diploma Policy (DP)	For the relation between this course and the Diploma Policy (DP), please refer to the following URL. https://www.keiho-u.ac.jp/faculty/taken/curriculummap.html		
Learning Outcomes	Be able to apply knowledge and theories on intercultural understanding, international relations, and international cultural studies learned in lecture courses and other courses to globalization and culture, and carry out analysis and examination. Be able to organize and explain prior research on one's own research theme. Be able to convey one's own opinions on other students' research themes and presentations and discuss other students' research themes. Write a 3,000-character research report on one's own research theme.		
Correspondence to Qualifications and Certification Exams			
Method of Feedback	For group research, appropriate comments and advice on its methodology and research methods are given as feedback. For presentations and reports, comments and points for improvement are presented.

Regarding taking this course	Students who are interested in the various languages of the world themselves and in phenomena related to language are welcome. In class, through close reading of papers and specialized books, we will think about how to view language as an object of research, research methods, and so on. We expect each student to have a “question” and to seek their own “answer” through the class.

Theme	Considering Multicultural Coexistence between Foreign Residents and Local Communities in the Era of Globalization		
Course Objectives and Overview	In this seminar, from the perspectives of sociology and international sociology, we take up migration issues, urban issues, and the various challenges facing local communities. With the advance of globalization, the movement of people across national borders has become an everyday phenomenon, and the relationship between migrants and the receiving society (host society) has become an important object of study for understanding contemporary society. In recent years in particular, attention has been focused on the effects that the residence and entrepreneurship of foreign residents in Japan have on local communities, urban structures, and people's everyday lives. In this seminar, students deepen their understanding of these issues from both theory and concrete cases, set research themes based on their own interests, and gradually learn the basics of drawing up research plans with a view to the graduation research, research methods, and collection of materials. In the first semester, students read literature in related fields in a group reading format and acquire the basic skills of how to read literature, preparing handouts, and giving presentations. On that basis, they examine topics for the graduation research.		
Prerequisites and Notes	・In this seminar, independence, teamwork, and leadership are required. ・Initiative to act on one's own, a collaborative spirit, and an attitude of taking part proactively in discussions are necessary.		
Relation to the Diploma Policy (DP)	For the relation between this course and the Diploma Policy (DP), please refer to the following URL. https://www.keiho-u.ac.jp/faculty/taken/curriculummap.html		
Learning Outcomes	・Apply the knowledge and theories on intercultural understanding, multicultural coexistence, and international sociology learned so far to issues of globalization and local communities, and acquire the ability to analyze and examine social phenomena. ・Acquire basic academic skills by setting one's own research theme and learning the series of research processes through to the collection and analysis of materials and the presentation of research results. ・Decide on a graduation research theme based on one's own interests, conduct investigation and analysis using sociological knowledge and methods, and become able to write a research report. ・Deepen understanding of issues concerning cities, regions, and multicultural coexistence, and cultivate an attitude of working on society toward solving problems.

Theme	Anglo-American Cultural Studies: Analysis of the History and Representations of Popular Culture		
Course Objectives and Overview	In this course, taking British and American popular culture as the theme, students study across diverse fields such as film, fashion, music, theater, and art, and aim to understand the interrelationship between the social and historical backgrounds from the 1970s to the present and cultural phenomena. Enrolled students select themes based on their own interests and experience the series of processes from researching materials and analysis to presentation. Through group work and discussion, they also develop basic skills necessary for research activities, such as communication skills, collaboration, leadership, and issue-discovery ability. The purpose of this course is to cultivate the ability to understand British and American popular culture from multiple angles and to read it critically on the basis of its historical and social contexts. Using the perspectives of cultural theory and representation analysis, students examine how popular culture has been formed and developed and build the foundation of cultural literacy, which is indispensable for understanding Anglo-American culture. In addition, through learning activities such as close reading and analysis of materials, group work, discussion, and presentations, students explore the interaction between culture and society and develop a perspective for reading trends in contemporary society.

Theme	Thinking about Problems Occurring in the World		
Course Objectives and Overview	In this seminar, each enrolled student thinks about problems occurring in the world and, through study, will carry out research over two years. Enrolled students are asked to participate actively and to speak up. In April, students present what kind of graduation research they are considering and clarify their current thinking about their graduation research. Based on that, from May we will read related books and papers in a group reading format, and students will acquire the skills to read specialized books (specialized papers). For the group reading, we will also respond to requests from enrolled students. In group reading, a presenter is decided in advance, who summarizes and reports on the chapter (paper) in charge and learns presentation skills. Based on those reports, all enrolled students raise questions about the content and hold discussions, aiming to improve those skills. In the spring semester, newspaper articles on events that occurred in the world are distributed in the week before the seminar, and a person in charge is decided to present on them the following week. The instructor then provides commentary. During the summer break, students will read at least one book and report on it in the fall semester.

Learning Outcomes	Students read basic literature on problems occurring in the world and, through discussion, narrow down the theme of their graduation research. Through the seminar, students are also expected to develop an interest in the world and use the seminar as an opportunity to learn what they themselves are interested in. For that purpose, read in advance the literature designated beforehand, and presenters should prepare handouts. In the seminar, the goal is to speak and discuss through active participation.

Theme	Learn the Theory and Reality of International Politics		
Course Objectives and Overview	In this seminar, students analyze various international problems from the perspective of international politics and learn about the past, present, and future of the international community. The central object of analysis in the seminar is international relations in the Asia-Pacific region, but international issues in other regions and in new domains (such as cybersecurity) are also covered. International politics, especially international relations in East Asia, is deeply connected to our lives. In today's world, where globalization is deepening, not only the activities of public institutions and companies but also the safety and security of each of us as individuals are affected by changes in the international situation. It is extremely important to know about current affairs occurring day by day, but merely obtaining information does not enable one to understand international politics. In this seminar, enrolled students read specialized books and collections of papers on international politics and, through repeated discussion, learn knowledge related to international politics while also mastering the analytical methods of international politics. The content may be adjusted according to the level of understanding and the requests of enrolled students.

Theme	Study Japanese culture and comparative culture.		
Course Objectives and Overview	Following “Specialized Seminar II A,” this course aims to narrow down the themes that each student is working on and to deepen their examination of them. In the present age, global society is advancing, and exchanges across national borders are increasing year by year. For those who will work in Japanese workplaces in the future, it is a very important task to understand the characteristics of Japanese culture more deeply and to explain them to foreigners in English. In this seminar, we will think about the characteristics of Japanese culture. We will think about them more deeply, taking into view not only present-day cultural phenomena but also the culture of pre-modern periods. In addition, from the perspective of international collaborative learning, we will make comparisons with the cultures of other countries (or one’s own country). This seminar is conducted mainly in English. As teaching materials, students will closely read passages from literature on Japanese culture, and pair work, group work, student presentations, and other activities will be conducted in English. Through study and practice in this seminar, we hope that you will also build the strong “intercultural understanding ability” required in today’s workplaces.

Learning Outcomes	In the first half of the class, each enrolled student gives an explanation based on materials on Japanese culture and comparative culture. In the second half of the class, students divide into groups, conduct research on a specific theme, and compile the content toward the presentation. Through group activities such as group discussions, students acquire independence, teamwork, leadership, and other qualities.

Theme	Become able to read literature centered on the economy of the Asia-Pacific region, and read and examine in depth literature related to the graduation research		
Course Objectives and Overview	In Specialized Seminars II A and B, the purpose is to acquire the ability to interpret materials and literature on economic phenomena, the ability to understand economic phenomena from tables and figures, the ability to display data in tables and figures in an easy-to-understand way, and the ability to examine economic phenomena through data. Specifically, ・Deepening understanding of social phenomena, centered on the economy, by carefully reading literature while looking up unfamiliar terms ・Discovering issues by learning in depth about phenomena of interest through reading books and papers Through these activities, students decide on the theme and topic of their graduation research. Also, as necessary, ・Learning how to use a computer so that data can be displayed in tables and figures in an easy-to-understand way ・Learning how to create tables and figures from existing questionnaire survey data ・Learning the methods of questionnaire surveys are also objectives. Students who particularly wish to learn about handling data and questionnaire surveys will be taught outside class hours, so please let the instructor know.

Theme	Anglo-American Cultural Studies: Theoretical Exploration of Popular Culture and Research Practice		
Course Objectives and Overview	In this course, building on the cultural literacy and basic inquiry skills acquired in “Specialized Seminar II A,” students take the lead in studying a specific theme in depth. Enrolled students set research themes based on their own interests and learn in a practical manner the series of processes from organizing prior research, researching materials, analysis, and examination to presenting research results. In addition, through group work and seminar-style discussion, they comprehensively cultivate the skills necessary for advancing research, such as collaboration, communication skills, leadership, and issue-discovery ability. The purpose of this course is, on the basis of the knowledge and perspectives cultivated in Specialized Seminar II A, for each student to set a clear research theme and, through diverse learning activities such as close reading and analysis of materials, examination of prior research, discussion, and presentations, to deepen the ability to explore the interaction between culture and society in an academic manner. In particular, using British and American popular culture as a clue, students critically read trends in contemporary society, develop a perspective for broadly grasping the world from the viewpoint of multicultural coexistence, and aim to improve their ability to express research results logically and persuasively.

Learning Outcomes	Be able to set a theme of one’s own interest and clearly explain the research purpose and questions. Be able to appropriately collect and organize prior research and related materials and, understanding the background of the research, make use of them in analysis. Be able to select and appropriately use basic methods in cultural studies (such as historical analysis, text analysis, and application of cultural theory). Be able to build logical arguments on the basis of materials and express one’s own opinions on the basis of evidence. Be able to present research content clearly, orally and with slides, etc., and deepen discussion while responding to questions. Be able to advance research in collaboration with peers and improve one’s own research by incorporating the perspectives of others. Based on the research skills acquired in Specialized Seminar II A, engage in continuous and advanced research.

Theme	Examine Globalization and Culture Based on Knowledge and Theories of Intercultural Understanding, International Relations, and International Cultural Studies		
Course Objectives and Overview	Following “Specialized Seminar II A,” the purpose of this course is to learn knowledge about a specific theme in a specialized field and, through engaging in investigation and research, to learn the series of processes from setting a theme and researching materials to analysis and presentation of the research results. Enrolled students select themes based on their own interest in issues and strengthen their output ability and logical thinking ability through presentations and discussions. Through group work, they also acquire communication skills, collaboration and leadership, issue-discovery ability, and so on.		
Prerequisites and Notes	“Seminar courses” are courses of comprehensive learning in which knowledge and theories learned in lecture courses and other courses are applied to the various issues of global society for analysis and examination. Students conduct investigation and research on specific themes according to their own interests and concerns, and through this process acquire an attitude and orientation of acting proactively, with the aim of improving creative thinking. In seminars, experiential learning and active learning are actively incorporated to cultivate “international collaboration skills” such as independence, teamwork, leadership, and initiative. “Seminar courses” are allocated as “Foundation Seminar A” and “Foundation Seminar B” in the first year, “Specialized Seminar I A” and “Specialized Seminar I B” in the second year, “Specialized Seminar II A” and “Specialized Seminar II B” in the third year, and “Specialized Seminar III A” and “Specialized Seminar III B” in the fourth year, and while emphasizing the improvement of the abilities required of global human resources, course registration guidance and career guidance are also provided, and students ultimately write a graduation thesis.		
Relation to the Diploma Policy (DP)	For the relation between this course and the Diploma Policy (DP), please refer to the following URL. https://www.keiho-u.ac.jp/faculty/taken/curriculummap.html		
Learning Outcomes	Be able to apply knowledge and theories on intercultural understanding, international relations, and international cultural studies learned in lecture courses and other courses to globalization and culture, and carry out analysis and examination. Be able to explain the relationship between prior research on one’s own research theme and one’s own theme. Be able to discuss other students’ research themes and presentations and, while conveying one’s own opinions, convey issues and points of merit. Write an 8,000-character research report on one’s own research theme.

Regarding taking this course	From international relations, international cultural studies, and international sociology, students learn how to grasp cultural phenomena around the world. Then, regarding their own themes, research guidance is given on the validity of how questions are formulated, the validity of research methods, and the development of arguments. In class, while reading specialized books, we will think about international relations, ways of viewing the world, and culture. We will also take on the challenge of understanding global society through reading Western-language books.

Theme	Considering Multicultural Coexistence between Foreign Residents and Local Communities in the Era of Globalization		
Course Objectives and Overview	In this seminar, from the perspectives of sociology and international sociology, we take up migration issues, urban issues, and the various challenges facing local communities. With the advance of globalization, the movement of people across national borders has become an everyday phenomenon, and the relationship between migrants and the receiving society (host society) has become an important object of study for understanding contemporary society. In recent years in particular, attention has been focused on the effects that the residence and entrepreneurship of foreign residents in Japan have on local communities, urban structures, and people's everyday lives. In this seminar, students deepen their understanding of these issues from both theory and concrete cases, set research themes based on their own interests, and gradually learn the basics of drawing up research plans with a view to the graduation research, research methods, and collection of materials. In the first semester, students read literature in related fields in a group reading format and acquire the basic skills of how to read literature, preparing handouts, and giving presentations. On that basis, they work on their own tasks, aiming to complete the graduation research interim report.		
Prerequisites and Notes	・In this seminar, independence, teamwork, and leadership are required. ・Initiative to act on one's own, a collaborative spirit, and an attitude of taking part proactively in discussions are necessary.		
Relation to the Diploma Policy (DP)	For the relation between this course and the Diploma Policy (DP), please refer to the following URL. https://www.keiho-u.ac.jp/faculty/taken/curriculummap.html		
Learning Outcomes	・Apply the knowledge and theories on intercultural understanding, multicultural coexistence, and international sociology learned so far to issues of globalization and local communities, and acquire the ability to analyze and examine social phenomena. ・Acquire basic academic skills by setting one's own research theme and learning the series of research processes through to the collection and analysis of materials and the presentation of research results. ・Decide on a graduation research theme based on one's own interests, conduct investigation and analysis using sociological knowledge and methods, and become able to write a research report. ・Deepen understanding of issues concerning cities, regions, and multicultural coexistence, and cultivate an attitude of working on society toward solving problems.

Theme	Understanding Contemporary Korean Society and Culture through Comparison and Questions		
Course Objectives and Overview	In this seminar, taking contemporary Korean society and culture as the main case, we examine the cultural and social backgrounds that shape the behaviors and values we take for granted in everyday life. Through concrete examples from Korean society, the aim is to acquire a perspective for comparing and relativizing cultures and to learn “methods of area studies.” In the seminar, texts (such as papers) on themes of interest to the enrolled students, such as politics, economy, society, and culture, are selected, read, and discussed. In addition, through comparison with their own life experiences and the countries and regions where they grew up, students cultivate an attitude of mutual understanding. This seminar is not centered on lectures but emphasizes active learning through reading, writing, and speaking. Through reading of literature, reports, presentations, and discussions, students develop the ability to formulate questions, examine them on the basis of evidence, and convey their findings to others.		
Prerequisites and Notes	Please participate actively in every class. This seminar emphasizes the independent learning of enrolled students, and students practice selecting materials related to their respective themes, reading them, and explaining them in their own words. Even if you find this difficult at first, we expect that you will gradually become accustomed to it by participating with the awareness that you are “practicing.” Group work, presentations, announcements, discussions, and other activities will also be conducted.		
Relation to the Diploma Policy (DP)	For the relation between this course and the Diploma Policy (DP), please refer to the following URL. https://www.keiho-u.ac.jp/faculty/taken/curriculummap.html		
Learning Outcomes	Through taking this seminar, the goal is for enrolled students to acquire the following abilities. 1. Acquire basic knowledge of contemporary Korean society and culture, and be able to explain cultural and social phenomena on the basis of concrete examples. 2. While comparing with the culture of one’s own daily life and of the country or region where one grew up, be able to relativize culture, and to formulate questions and examine them. 3. Be able to read literature appropriately, compile one’s own thoughts in writing or presentations on the basis of evidence, and convey them to others.

Regarding taking this course	In this seminar, students practice actively reading materials, explaining their content in their own words, and putting their thoughts into words. In addition to deepening knowledge of contemporary Korean society and culture, importance is placed on investigating and comparing the region or country where one grew up. In addition, by considering what “culture” is and under what historical and social backgrounds culture has been formed, students deepen their understanding of different cultures. Presentations and discussions are positioned as places for practice, so please participate actively and deepen your learning.

[Preparation] 1. Select one paper or material on a regional culture of Korea that interests you and grasp its content. 2. For the case examples addressed in that material, briefly organize “what is explained as culture and how.” 3. Note down points you would like to share in class and questions. [Review] 1. Reflect on the case analysis and discussion in class, and organize the points where your understanding deepened and the new questions that arose. 2. Based on other students’ presentations and opinions, review your own theme of interest and perspectives. 3. Confirm the additional points you need to investigate for research and presentations from the next class onward.	4 hours
Session 4	In-person	[From “Reading” to “Using” Papers: Preparation for Individual Research] Through how to select and read materials and how to formulate questions, learn the methods of area studies concretely. Reading papers deeply: organizing structure, questions, and claims. How to make use of papers in research (the concept of prior research) Drawing up a research plan based on the individual theme (questions, materials, methods) Exchange of opinions and comments from the instructor	[Preparation] 1. Select one paper or material on a regional culture of Korea that interests you and grasp its content. 2. For the case examples addressed in that material, briefly organize “what is explained as culture and how.” 3. Note down points you would like to share in class and questions. [Review] 1. Reflect on the case analysis and discussion in class, and organize the points where your understanding deepened and the new questions that arose. 2. Based on other students’ presentations and opinions, review your own theme of interest and perspectives. 3. Confirm the additional points you need to investigate for research and presentations from the next class onward.	4 hours
Session 5	In-person	[Presentation Structure and Drafting a Working Draft] Purpose of the presentation and approach to its structure (question, background, case example	[Preparation] 1. Revise the presentation structure based on the exchange of opinions in class and comments from the instructor. 2. Search for related prior research and materials. 3. Organize your state of preparation and tasks for the presentations from the next class onward.	
Session 6	In-person	[Individual Research and Presentation (Introduction): Searching for Materials and Setting the Direction of Research] Confirmation of each student's research theme and question (brief sharing) Searching for and reading materials for individual research (close reading of papers and materials) Organizing the main points of the materials used and sharing research progress Questions and comments from the instructor and classmates, and exchange of opinions	[Preparation] 1. Organize the themes and fields of interest you want to handle as your individual research. 2. Search for papers and materials related to your theme of interest, and select 1-2 candidates. 3. Briefly note down the outline of the content and the points that interested you in the materials you selected. [Review] 1. Reflect on the materials search and exchange of opinions carried out in class, and review your research theme and question. 2. Organize the main points of the materials you will use and summarize the direction of future research. 3. Confirm the additional points you need to investigate for individual research from the next class onward.	4 hours
Session 7	In-person	[Individual Research and Presentation Preparation: Organizing Main Points and Presentation Structure] Reconfirmation of the individual research theme and question Organizing the main points of the materials used (papers and materials) Examination of the presentation structure with a research presentation conference in mind Sharing of content and exchange of opinions in pairs or small groups Comments from the instructor and confirmation of how to proceed	[Preparation] 1. Read the papers and materials to be used in your individual research and organize the main points of their content. 2. Confirm how the materials relate to your research theme and question. 3. Briefly summarize in bullet points the points you want to convey in the presentation (background, case examples, examination). [Review] 1. Review the presentation structure based on the exchange of opinions in class and comments from the instructor. 2. Organize the materials and research content that are lacking for the research presentation conference. 3. Proceed with creating presentation materials for the individual presentations from the next class onward.	4 hours

Theme	Thinking about Problems Occurring in the World		
Course Objectives and Overview	In the fall semester, students will first report on their summer break assignment. After that, in order for them to write a book review of the book they have read, guidance on how to write a book review will be given and they will submit it. Lectures will also be given on how to investigate the data needed for the graduation research, how to search for materials, and how to write an interim report. Enrolled students narrow down the theme they will take up in their graduation research and will report at least once in the seminar in the sessions from Session 10 onward. Enrolled students comment on and ask questions about the reports and deepen the discussion. Through the reports, this is an opportunity to learn the issues and current state of what they will take up in their graduation thesis and to know what to investigate in the future in order to compile the graduation thesis. At the end of the fall semester, students will submit an interim report on the graduation research of about 5,000 characters, which will lead to the graduation research in the fourth year.

Theme	Consider various global issues (ethnic conflicts, discrimination based on race and gender, refugees and internally displaced persons, climate change, the marine plastic problem, etc.) from the perspective of international law.		
Course Objectives and Overview	The purpose of this course is for each student to narrow down the theme they are working on and deepen their examination of it. In particular, while improving basic research and analysis skills such as conceiving themes, methods of analysis, and handling of materials, students also work on compiling their results in logical writing, going beyond oral presentation. Through group work, the course also aims to further improve communication skills, collaboration and leadership, and issue-discovery ability.		
Prerequisites and Notes	In this course, lively discussions are held among enrolled students. If you need special consideration in order to take this course, please consult the instructor in advance. If you require reasonable accommodation because of a disability (including intractable diseases and chronic illnesses), please refer to the university's Support for Students with Disabilities (https://www.keiho-u.ac.jp/life/support/barrierfree.html) and consult with us.

Theme	Examine Globalization and Culture Based on Knowledge and Theories of Intercultural Understanding, International Relations, and International Cultural Studies		
Course Objectives and Overview	Following "Specialized Seminar II B," the purpose of this course is to learn knowledge about a specific theme in a specialized field and, through engaging in one's own investigation and research, to learn the series of processes from setting a theme and researching materials to analysis and presentation of the research results. Enrolled students advance their research based on their own interest in issues and strengthen their output ability and logical thinking ability through presentations and discussions. Through group work, they also acquire communication skills, collaboration and leadership, issue-discovery ability, and so on.		
Prerequisites and Notes	"Seminar courses" are courses of comprehensive learning in which knowledge and theories learned in lecture courses and other courses are applied to the various issues of global society for analysis and examination. Students conduct investigation and research on specific themes according to their own interests and concerns, and through this process acquire an attitude and orientation of acting proactively, with the aim of improving creative thinking. In seminars, experiential learning and active learning are actively incorporated to cultivate "international collaboration skills" such as independence, teamwork, leadership, and initiative. "Seminar courses" are allocated as "Foundation Seminar A" and "Foundation Seminar B" in the first year, "Specialized Seminar I A" and "Specialized Seminar I B" in the second year, "Specialized Seminar II A" and "Specialized Seminar II B" in the third year, and "Specialized Seminar III A" and "Specialized Seminar III B" in the fourth year, and while emphasizing the improvement of the abilities required of global human resources, course registration guidance and career guidance are also provided, and students ultimately write a graduation thesis.		
Relation to the Diploma Policy (DP)	For the relation between this course and the Diploma Policy (DP), please refer to the following URL. https://www.keiho-u.ac.jp/faculty/taken/curriculummap.html		
Learning Outcomes	Be able to apply knowledge and theories on intercultural understanding, international relations, and international cultural studies learned over three years to globalization and culture, and carry out analysis and examination. Be able to give a presentation on one's own research theme using evidence. Be able to convey one's own views and discuss other students' research themes and presentations. Compile the content toward one's own presentation and write an 8,000-character graduation thesis.		
Correspondence to Qualifications and Certification Exams			
Method of Feedback	For group research, appropriate comments and advice on its methodology and research methods are given as feedback. For presentations and reports, comments and points for improvement are presented.

Theme	Study politics, economics, and society from the perspective of global history.		
Course Objectives and Overview	Based on the content of Specialized Seminars II A and B, students study the issues of contemporary society from a historical perspective and, through analysis and examination, the aim is to develop the research project that each student is working on. Students deepen their research project by conducting a literature survey related to the theme and examining it on that basis. The results of the research project are reported in class (individually or in groups), and enrolled students hold discussions among themselves under the guidance of the instructor.		
Prerequisites and Notes	Only “motivation.”		
Relation to the Diploma Policy (DP)	For the relation between this course and the Diploma Policy (DP), please refer to the following URL. https://www.keiho-u.ac.jp/faculty/taken/curriculummap.html		
Learning Outcomes	① Be able to observe the issues of contemporary society, understand them from a historical perspective, and compile one’s own views. ② Be able to conduct investigation and research on a specific theme and acquire useful points at issue and prescriptions that contribute to the diversity of the international community and to collaboration with others who have different values and cultural backgrounds. ③ Aim to further improve presentation skills and collaboration skills.		
Correspondence to Qualifications and Certification Exams			
Method of Feedback	① Submitted work (comment papers and reports) is returned in the next and subsequent classes, and an exchange of opinions is held within the seminar together with other students. ② Make use of ICT means, including the discussion function of the Learning Portal.

Theme	Study Japanese culture and comparative culture.		
Course Objectives and Overview	Following “Specialized Seminar II B,” this course aims to narrow down the themes that each student is working on and to deepen their examination of them. In the present age, global society is advancing, and exchanges across national borders are increasing year by year. For those who will work in Japanese workplaces in the future, it is a very important task to understand the characteristics of Japanese culture more deeply and to explain them to foreigners in English. In this seminar, we will think about the characteristics of Japanese culture. We will think about them more deeply, taking into view not only present-day cultural phenomena but also the culture of pre-modern periods. In addition, from the perspective of international collaborative learning, we will make comparisons with the cultures of other countries (or one’s own country). This seminar is conducted mainly in English. As teaching materials, students will closely read passages from literature on Japanese culture, and pair work, group work, student presentations, and other activities will be conducted in English. Through study and practice in this seminar, we hope that you will also build the strong “intercultural understanding ability” required in today’s workplaces.		
Prerequisites and Notes	Because presentations and discussions are conducted in English, active participation is required.		
Relation to the Diploma Policy (DP)	For the relation between this course and the Diploma Policy (DP), please refer to the following URL. https://www.keiho-u.ac.jp/faculty/taken/curriculummap.html		
Learning Outcomes	In the first half of the class, each enrolled student gives an explanation based on materials on Japanese culture and comparative culture. In the second half of the class, students divide into groups, conduct research on a specific theme, and compile the content toward the presentation. Through group activities such as group discussions, students acquire independence, teamwork, leadership, and other qualities. Students will be able to explain and give presentations in English.

Theme	Learn the Theory and Reality of International Politics		
Course Objectives and Overview	In this seminar, students analyze various international problems from the perspective of international politics and learn about the past, present, and future of the international community. The central object of analysis in the seminar is international relations in the Asia-Pacific region, but international issues in other regions and in new domains (such as cybersecurity) are also covered. International politics, especially international relations in East Asia, is deeply connected to our lives. In today's world, where globalization is deepening, not only the activities of public institutions and companies but also the safety and security of each of us as individuals are affected by changes in the international situation. It is extremely important to know about current affairs occurring day by day, but merely obtaining information does not enable one to understand international politics. In this seminar, enrolled students read specialized books and collections of papers on international politics and, through repeated discussion, learn knowledge related to international politics while also mastering the analytical methods of international politics. The content may be adjusted according to the level of understanding and the requests of enrolled students.

Theme	Consider various global issues concerning people (discrimination based on race and gender, modern slavery and child labor, refugees, child soldiers, climate change, the marine plastic problem, etc.) from the perspective of international law.		
Course Objectives and Overview	Comprehensive learning is carried out by applying the knowledge and theories of law and politics learned in lecture courses and other courses to international legal policies toward solving global issues (human rights, the environment, international crime, anti-corruption, armed conflict, etc.) and conducting further analysis and examination. In the first half of the class, based on what was learned in "Specialized Seminar III A," each enrolled student conducts investigation and analysis related to their theme. In the second half of the class, the content of the investigation and analysis is presented, and through discussion among the instructor and enrolled students, understanding of the content is deepened and the research project is completed.

Learning Outcomes	Following "Specialized Seminar III A," in this course, students work on research projects based on specialized themes. Each student gives an interim presentation of the results of their research project and, through discussion in class, clarifies the specific issues that must be examined. Students also further improve their ability to carry out the series of processes of investigation, analysis, and presentation and their ability to think logically. As the culmination of their learning in the undergraduate program, they complete their research results under the guidance of the instructor.

Course Category	Faculty of International Studies Specialized Courses		
Theme	Examine Globalization and Culture Based on Knowledge and Theories of Intercultural Understanding, International Relations, and International Cultural Studies		
Course Objectives and Overview	Following “Specialized Seminar III A,” in this course, the purpose is to learn knowledge about a specific theme in a specialized field and, through engaging in one’s own investigation and research, to learn the series of processes from setting a theme and researching materials to analysis and presentation of the research results. Enrolled students advance their research based on their own interest in issues and strengthen their output ability and logical thinking ability through presentations and discussions. As the culmination of four years of study, students write a 12,000-character graduation thesis.		
Prerequisites and Notes	“Seminar courses” are courses of comprehensive learning in which knowledge and theories learned in lecture courses and other courses are applied to the various issues of global society for analysis and examination. Students conduct investigation and research on specific themes according to their own interests and concerns, and through this process acquire an attitude and orientation of acting proactively, with the aim of improving creative thinking. In seminars, experiential learning and active learning are actively incorporated to cultivate “international collaboration skills” such as independence, teamwork, leadership, and initiative. “Seminar courses” are allocated as “Foundation Seminar A” and “Foundation Seminar B” in the first year, “Specialized Seminar I A” and “Specialized Seminar I B” in the second year, “Specialized Seminar II A” and “Specialized Seminar II B” in the third year, and “Specialized Seminar III A” and “Specialized Seminar III B” in the fourth year, and while emphasizing the improvement of the abilities required of global human resources, course registration guidance and career guidance are also provided, and students ultimately write a graduation thesis.		
Relation to the Diploma Policy (DP)	For the relation between this course and the Diploma Policy (DP), please refer to the following URL. https://www.keiho-u.ac.jp/faculty/taken/curriculummap.html		
Learning Outcomes	Be able to apply knowledge and theories on intercultural understanding, international relations, and international cultural studies to globalization and culture, and carry out analysis and examination. Be able to give a presentation on one’s own research theme using evidence. Be able to convey one’s own views and discuss other students’ research themes and presentations. Compile the content toward one’s own presentation and write a 12,000-character graduation thesis.		
Correspondence to Qualifications and Certification Exams			
Method of Feedback	For group research, appropriate comments and advice on its methodology and research methods are given as feedback. For presentations and reports, comments and points for improvement are presented.

Theme	Learn the Theory and Reality of International Politics		
Course Objectives and Overview	In this seminar, students analyze various international problems from the perspective of international politics and learn about the past, present, and future of the international community. The central object of analysis in the seminar is international relations in the Asia-Pacific region, but international issues in other regions and in new domains (such as cybersecurity) are also covered. International politics, especially international relations in East Asia, is deeply connected to our lives. In today's world, where globalization is deepening, not only the activities of public institutions and companies but also the safety and security of each of us as individuals are affected by changes in the international situation. It is extremely important to know about current affairs occurring day by day, but merely obtaining information does not enable one to understand international politics. In this seminar, enrolled students read specialized books and collections of papers on international politics and, through repeated discussion, learn knowledge related to international politics while also mastering the analytical methods of international politics. The content may be adjusted according to the level of understanding and the requests of enrolled students.

Theme	Study Japanese culture and comparative culture.		
Course Objectives and Overview	Following “Specialized Seminar III A,” this course aims to narrow down the themes that each student is working on and to deepen their examination of them. In the present age, global society is advancing, and exchanges across national borders are increasing year by year. For those who will work in Japanese workplaces in the future, it is a very important task to understand the characteristics of Japanese culture more deeply and to explain them to foreigners in English. In this seminar, we will think about the characteristics of Japanese culture. We will think about them more deeply, taking into view not only present-day cultural phenomena but also the culture of pre-modern periods. In addition, from the perspective of international collaborative learning, we will make comparisons with the cultures of other countries (or one’s own country). This seminar is conducted mainly in English. As teaching materials, students will closely read passages from literature on Japanese culture, and pair work, group work, student presentations, and other activities will be conducted in English. Through study and practice in this seminar, we hope that you will also build the strong “intercultural understanding ability” required in today’s workplaces.		
Prerequisites and Notes			
Relation to the Diploma Policy (DP)	For the relation between this course and the Diploma Policy (DP), please refer to the following URL. https://www.keiho-u.ac.jp/faculty/taken/curriculummap.html		
Learning Outcomes	In the first half of the class, each enrolled student gives an explanation based on materials on Japanese culture and comparative culture. In the second half of the class, students divide into groups, conduct research on a specific theme, and compile the content toward the presentation. Through group activities such as group discussions, students acquire independence, teamwork, leadership, and other qualities. Students will be able to explain and give presentations in English.

Theme	From the perspective of linguistics, which treats language itself as the object of study, research various problems concerning language.		
Course Objectives and Overview	By applying the knowledge and theories of linguistics learned in the lecture courses taken so far to various problems concerning language, students advance academic research and, following Specialized Seminar III A, aim to complete each student's graduation research based on the theme they have pursued since Specialized Seminar II. In class, the results are reported as appropriate, which leads to writing a higher-quality graduation thesis through discussion and the like.		
Prerequisites and Notes			
Relation to the Diploma Policy (DP)	For the relation between this course and the Diploma Policy (DP), please refer to the following URL. https://www.keiho-u.ac.jp/faculty/taken/curriculummap.html		
Learning Outcomes	Following Specialized Seminar III A, the purpose is to advance the research continued from Specialized Seminar II and carry out more advanced graduation research. Based on the insights gained through discussion and the like, students reexamine the issues pointed out in presentations and make revisions as appropriate, and complete the graduation thesis as the outcome of four years of study. Through group activities in class, they also acquire independence, collaboration, leadership, and other qualities.		
Correspondence to Qualifications and Certification Exams			
Method of Feedback	For the graduation research, appropriate comments and advice on theories and methods of analysis and examination are given as feedback. For presentations and reports, feedback is given in the form of comments and points for improvement.

Theme	Writing the Graduation Thesis		
Course Objectives and Overview	Based on the reports in “Specialized Seminars III A and B” and the instructor’s guidance, students complete the graduation thesis. For details, be sure to refer to the “Graduation Research Guide” issued at the beginning of the academic year. Students select a theme from the field of specialization of their own seminar chosen in the third year, and complete the thesis using all of their information utilization skills, ability to understand literature, ability to verify and examine, writing ability, and their own concentration and perseverance. It is the culmination of four years of university study centered on international studies. Through writing the graduation thesis, students deepen their specialized knowledge of international studies and acquire the ability to work toward solving the issues of contemporary society that is necessary for being active in society.

Theme	Raise interest in the world and gain “awareness”		
Course Objectives and Overview	This course consists of pre- and post-class study and about five sessions (equivalent to five class sessions) of hands-on activities and training. Through intensive pre- and post-class study and on-site experiences, study, visits, and exchange activities, the purpose is to deepen understanding of Japanese society and cultivate intercultural understanding, communication skills, and collaboration skills. In addition, through the process of study and experience, it aims to cultivate international awareness and to form and enhance motivation for learning. The instructor in charge evaluates grades based on the degree of achievement of learning goals, the content of the project report, the results of the presentation of learning outcomes, and so on. Since the learning content, schedule, and submissions required for grade evaluation differ for each program (class), be sure to check the introduction of each program (class) when registering for this course.		
Prerequisites and Notes	Independence, teamwork, and leadership are required in pre- and post-class study and in on-site experiences, visits, and exchange activities.

Regarding taking this course	This program aims to help students acquire an international perspective and sensibility as “learning rooted in social context” through area studies targeting Korea. In pre-class study, brainstorming is conducted to consider the mindset for on-site study, and students learn about Korean language, culture, and society from multiple perspectives. By participating in the local program on the basis of this learning, the knowledge gained in the classroom is connected with real experience, and the ability to grasp things in an international context is cultivated. Starting from your own interests and concerns, broaden your perspective, acquire an attitude of understanding by relativizing different values and cultures, and aim to connect this in the future to your graduation research and international career choices.

Regarding taking this course	This program aims to help students acquire an international perspective and sensibility as “learning rooted in social context” through area studies targeting Korea. In pre-class study, brainstorming is conducted to consider the mindset for on-site study, and students learn about Korean language, culture, and society from multiple perspectives. By participating in the local program on the basis of this learning, the knowledge gained in the classroom is connected with real experience, and the ability to grasp things in an international context is cultivated. Starting from your own interests and concerns, broaden your perspective, acquire an attitude of understanding by relativizing different values and cultures, and aim to connect this in the future to your graduation research and international career choices.

Regarding taking this course	This is a field project in which area studies are conducted with a single country or region in the Asia-Pacific region as the theme. In pre-class study, while learning about the culture, society, and economy of the country or region that is the theme, students learn from various perspectives, such as its relationship with Japan and the world and its importance in politics, economy, and business in the Asia-Pacific. Then, in the local program, you will begin to see the various “faces” of that country or region. Let’s value your own interests and concerns, broaden them, and connect them to your graduation research.

Regarding taking this course	This program aims to help students acquire an international perspective and sensibility as “learning rooted in social context” through area studies targeting Korea. In pre-class study, brainstorming is conducted to consider the mindset for on-site study, and students learn about Korean language, culture, and society from multiple perspectives. By participating in the local program on the basis of this learning, the knowledge gained in the classroom is connected with real experience, and the ability to grasp things in an international context is cultivated. Starting from your own interests and concerns, broaden your perspective, acquire an attitude of understanding by relativizing different values and cultures, and aim to connect this in the future to your graduation research and international career choices.

Regarding taking this course	This program aims to help students acquire an international perspective and sensibility as “learning rooted in social context” through area studies targeting Korea. In pre-class study, brainstorming is conducted to consider the mindset for on-site study, and students learn about Korean language, culture, and society from multiple perspectives. By participating in the local program on the basis of this learning, the knowledge gained in the classroom is connected with real experience, and the ability to grasp things in an international context is cultivated. Starting from your own interests and concerns, broaden your perspective, acquire an attitude of understanding by relativizing different values and cultures, and aim to connect this in the future to your graduation research and international career choices.

Regarding taking this course	This is a field project in which area studies are conducted with a single country or region in the Asia-Pacific region as the theme. In pre-class study, while learning about the culture, society, and economy of the country or region that is the theme, students learn from various perspectives, such as its relationship with Japan and the world and its importance in politics, economy, and business in the Asia-Pacific. Then, in the local program, you will begin to see the various “faces” of that country or region. Let’s value your own interests and concerns, broaden them, and connect them to your graduation research.

Regarding taking this course	This program aims to help students acquire an international perspective and sensibility as “learning rooted in social context” through area studies targeting Korea. In pre-class study, brainstorming is conducted to consider the mindset for on-site study, and students learn about Korean language, culture, and society from multiple perspectives. By participating in the local program on the basis of this learning, the knowledge gained in the classroom is connected with real experience, and the ability to grasp things in an international context is cultivated. Starting from your own interests and concerns, broaden your perspective, acquire an attitude of understanding by relativizing different values and cultures, and aim to connect this in the future to your graduation research and international career choices.

Regarding taking this course	This is a field project in which area studies are conducted with a single country or region in the Asia-Pacific region as the theme. In pre-class study, while learning about the culture, society, and economy of the country or region that is the theme, students learn from various perspectives, such as its relationship with Japan and the world and its importance in politics, economy, and business in the Asia-Pacific. Then, in the local program, you will begin to see the various “faces” of that country or region. Let’s value your own interests and concerns, broaden them, and connect them to your graduation research.

Theme	Understand the culture and social background of the study abroad destination and acquire the English proficiency necessary for smooth communication on site.		
Course Objectives and Overview	In this course, as a course corresponding to one-semester study abroad, students acquire the basic knowledge and skills necessary for studying abroad. In class, students conduct research and presentations on the local culture and social background to deepen their understanding of the destination. The aim is the comprehensive improvement of the four English skills, but in order to acquire the minimum English proficiency necessary for communicating on site, classes with an emphasis on strengthening output are carried out. In addition, by also being exposed to academic English, students build a foundation for understanding classes at the study abroad institution. In addition, students think about and discuss how the study abroad experience will contribute to their future careers, and are made aware of how to link these two organically.		
Prerequisites and Notes	Students planning to participate in the AY2026 one-semester study abroad in English-speaking countries (summer departure) must take this course. If the level of participation in class is extremely low, credit may not be granted. If you do not take the July TOEIC, credit may not be granted.

Course Category	Faculty of International Studies Specialized Courses		
Theme	Learning about Contemporary Japanese Society Together		
Course Objectives and Overview	This course consists of pre-class and post-class study and approximately six sessions (the equivalent of six class meetings) of on-site training. Domestic students and international students carry out the pre-class and post-class study together and deepen their understanding of Japanese society through on-site training, group work, and similar activities, with the aim of cultivating cross-cultural understanding, communication skills, and collaboration skills. In addition, through the process of study and experience, the course seeks to cultivate an international outlook and to form and enhance motivation to learn. The instructor in charge evaluates students' performance on the basis of the degree to which the learning goals are achieved, group work and presentations of learning outcomes, reports, and so on.		
Prerequisites and Notes	Because the learning content, schedule, and submissions required for grading differ by program (class), be sure to check the introduction of each program (class) when you register for this course.		
Relation to the Diploma Policy (DP)	For the relation between this course and the Diploma Policy (DP), please refer to the following URL. https://www.keiho-u.ac.jp/faculty/taken/curriculummap.html		
Learning Outcomes	Through pre-class and post-class study, on-site training, group work, and similar activities, students are expected to be able to do the following. 1) Understand and explain the politics, economy, culture, and society of contemporary Japan from multiple perspectives. 2) Cooperate and collaborate with peers from diverse backgrounds to work on issues. 3) Identify social problems and issues together with peers, and consider and propose solutions to them. 4) View matters from an international perspective and express their own views.		
Correspondence to Qualifications and Certification Exams			
Method of Feedback	・After presentations in class, or after the wrap-up of the on-site experience and training, students discuss with one another what they learned at each site visited, and the instructor conveys key points as appropriate. ・The instructor provides comments on submissions such as mini-reports and reflection essays. ・When preparing group presentations and deliverables, opportunities for mutual feedback are provided among students who shared the preparation process.

Course Category	Faculty of International Studies Specialized Courses		
Theme	Self-Understanding and Adaptation to University Life and Study		
Course Objectives and Overview	Together with International Career Development B, this course aims to build a foundation for international students to adapt smoothly to university life and to think proactively about their own studies and future. Students deepen their self-understanding, acquire the study skills and generic skills required at university, and develop a basic understanding of Japanese society and of "working." They also come to understand residence status, university rules, and the support resources available inside and outside the university, and develop the ability to seek advice and act appropriately when difficulties arise. By reflecting on their studies and experiences in the first year and setting goals that lead into their studies and activities from the second year onward, students aim to lay the foundation for career development. In addition, students develop the foundations of "speaking (interaction)" and "speaking (presentation)," and build the basis of the communication skills needed to convey their own thoughts and to seek advice when necessary.		
Prerequisites and Notes	The course combines lectures and exercises. Because pair or group interaction and mini-presentations are held in every session, active participation is required. Students are required to observe the rules and manners that are taken for granted in society and to participate actively in class.		
Relation to the Diploma Policy (DP)	For the relation between this course and the Diploma Policy (DP), please refer to the following URL. https://www.keiho-u.ac.jp/faculty/taken/curriculummap.html		
Learning Outcomes	・Be able to organize one's own strengths, interests, values, and learning experiences and put them into words in a self-understanding report (or portfolio). ・Understand the study skills required at university (information gathering / summarizing / quotation and citation / report-writing conventions, etc.) and complete basic assignments by the deadline. ・Conduct a self-assessment of generic skills (collaboration, communication, logic, problem solving, etc.), and set improvement goals and an action plan. ・Understand residence status, work restrictions, and the rules of university life, and be able to explain them in line with one's own situation and make appropriate judgments. ・Know where to seek advice (academic affairs, the International Center, career services, learning support, etc.), and, when difficulties arise, be able to select the necessary support resources and take action to seek advice. ・Based on one's first-year studies and life, be able to set short-term and medium-term goals for studies and experiences (classes, activities, study abroad, etc.) from the second year onward

Course Category	Faculty of International Studies Specialized Courses		
Theme	Designing Student Life with an Eye to the Future		
Course Objectives and Overview	International Career Development A, together with International Career Development B, is a course for cultivating the employability required of working members of society while thinking about one's "way of living, way of learning, and way of working (= career)" throughout life after graduation. Employability is the ability that students need in order to improve their own qualities after graduation and to achieve social and vocational independence. Furthermore, with the post-graduation paths of Faculty of International Studies students in mind, the course aims to help students understand the abilities and attitudes required of global human resources. In this course, drawing on changes in Japan's economic and social conditions and the advance of globalization, students cultivate employability by working on assignments themed "understanding of society, understanding of industries and companies, and understanding of occupations," in order to develop the views of society and of work that are important when choosing a career path after graduation. Through these understandings, students set their own goals for future career development and recognize the various issues to be addressed during their student years. Moreover, in order to envision their own career design in the context of globalization, students also work on assignments such as ① understanding work styles based on cross-cultural understanding and multicultural coexistence, ② understanding the characteristics of working overseas, and ③ understanding global careers within Japan.

Course Category	Faculty of International Studies Specialized Courses		
Theme	Self-Understanding and Adaptation to University Life and Study		
Course Objectives and Overview	This course follows International Career Development A and aims to build a foundation for international students to adapt smoothly to university life and to think proactively about their own studies and future. Students deepen their self-understanding, acquire the study skills and generic skills required at university, and develop a basic understanding of Japanese society and of "working." They also come to understand residence status, university rules, and the support resources available inside and outside the university, and develop the ability to seek advice and act appropriately when difficulties arise. By reflecting on their studies and experiences in the first year and setting goals that lead into their studies and activities from the second year onward, students aim to lay the foundation for career development. In addition, students develop the foundations of "speaking (interaction)" and "speaking (presentation)," and build the basis of the communication skills needed to convey their own thoughts and to seek advice when necessary.		
Prerequisites and Notes	The course combines lectures and exercises. Because pair or group interaction and mini-presentations are held in every session, active participation is required. Students are required to observe the rules and manners that are taken for granted in society and to participate actively in class.		
Relation to the Diploma Policy (DP)	For the relation between this course and the Diploma Policy (DP), please refer to the following URL. https://www.keiho-u.ac.jp/faculty/taken/curriculummap.html		
Learning Outcomes	・Be able to organize one's own strengths, interests, values, and learning experiences and put them into words in a self-understanding report (or portfolio). ・Understand the study skills required at university (information gathering / summarizing / quotation and citation / report-writing conventions, etc.) and complete basic assignments by the deadline. ・Conduct a self-assessment of generic skills (collaboration, communication, logic, problem solving, etc.), and set improvement goals and an action plan. ・Understand residence status, work restrictions, and the rules of university life, and be able to explain them in line with one's own situation and make appropriate judgments. ・Know where to seek advice (academic affairs, the International Center, career services, learning support, etc.), and, when difficulties arise, be able to select the necessary support resources and take action to seek advice. ・Based on one's first-year studies and life, be able to set short-term and medium-term goals for studies and experiences (classes, activities, study abroad, etc.) from the second year onward

Course Category	Faculty of International Studies Specialized Courses		
Theme	Designing Student Life with an Eye to the Future		
Course Objectives and Overview	International Career Development B, following International Career Development A, is a course for cultivating the employability required of working members of society while thinking about one's "way of living, way of learning, and way of working (= career)" throughout life after graduation. Employability is the ability that students need in order to improve their own qualities after graduation and to achieve social and vocational independence. Furthermore, with the post-graduation paths of Faculty of International Studies students in mind, the course aims to help students understand the abilities and attitudes required of global human resources. In this course, drawing on changes in Japan's economic and social conditions and the advance of globalization, students cultivate employability by working on assignments on themes such as "learning about various ways of working" and "thinking about industries," in order to develop the views of society and of work that are important when choosing a career path after graduation. Students then, while envisioning their own future career design, consider what abilities are required of working members of society and seek to develop them. To that end, drawing on the latest career circumstances, students work on various exercises and assignments while developing versatile foundational skills, including communication skills. Moreover, in order to envision their own career design in the context of globalization, students also work on assignments such as ① understanding work styles based on cross-cultural understanding and multicultural coexistence, ② understanding the characteristics of working overseas, and ③ understanding global careers within Japan.

Regarding taking this course	Through the course, students are expected to broaden their perspective on post-graduation paths and, together with a global perspective, to cultivate an attitude and values of engaging actively with career design. Career development courses are classes for acquiring the foundations needed to leave university and live in society. Students must observe the rules and manners taken for granted in society and participate actively in class. In particular, private conversation during class is a nuisance to other students, so students who cannot stop will be asked to leave the room.

Theme	Through collaboration with others and study that is conscious of society, students relativize their own values, ways of working, and views of career, and explore diverse career options and reconstruct their self-understanding.		
Course Objectives and Overview	Together with International Career Design B, this course aims, with a view to exploring diverse career options, to help students relativize their own values, ways of working, and views of career and to advance their preparation for future career decisions. Building on a basic understanding of industries, companies, and occupations, students cultivate the ability to gather, analyze, and communicate information through problem-based learning (PBL). The course consists of classes for international students only and mixed classes in which international students and Japanese students learn together; in the mixed classes, students are exposed to diverse perspectives through collaborative learning. In the classes for international students only, students aim to achieve the same learning goals through case studies and group work. In this course, "speaking (interaction)" and "speaking (presentation)" are positioned as advanced stages, and collaborative communication skills for comparison, proposal, and consensus building are developed.		
Prerequisites and Notes	Classes center on group work and presentations. In the mixed classes, students are expected to respect differences in cultural background and to seek consensus through dialogue. Students must observe the rules and manners taken for granted in society and participate actively in class.

Theme	Through collaboration with others and study that is conscious of society, students relativize their own values, ways of working, and views of career, and explore diverse career options and reconstruct their self-understanding.		
Course Objectives and Overview	Following International Career Design A in the spring semester, this course aims, with a view to exploring diverse career options, to help students relativize their own values, ways of working, and views of career and to advance their preparation for future career decisions. Building on a basic understanding of industries, companies, and occupations, students cultivate the ability to gather, analyze, and communicate information through problem-based learning (PBL). The course consists of classes for international students only and mixed classes in which international students and Japanese students learn together; in the mixed classes, students are exposed to diverse perspectives through collaborative learning. In the classes for international students only, students aim to achieve the same learning goals through case studies and group work. In addition, in this course, "speaking (interaction)" and "speaking (presentation)" are positioned as advanced stages, and collaborative communication skills for comparison, proposal, and consensus building are developed.		
Prerequisites and Notes	Classes center on group work and presentations. In the mixed classes, students are expected to respect differences in cultural background and to seek consensus through dialogue. Students must observe the rules and manners taken for granted in society and participate actively in class.

Theme	Improve employability toward the realization of one's desired career path.		
Course Objectives and Overview	International Career Seminar A aims to cultivate the employability needed to decide one's post-graduation path proactively and actively, and, making use of the characteristics of a seminar, proceeds mainly through group work. This course mainly addresses "self-analysis," "industry and company research," and "drafting a motivation statement." Because preparation tailored to the individual is important for realizing one's desired career path, starting job-hunting preparation through seminar-style classes advances self-understanding and understanding of companies and enables students to proceed with job hunting in a way they find satisfactory. While acquiring the ability to view oneself objectively and express oneself logically, students deepen their knowledge of industry through company research and industry research, form the groundwork for motivation statements that link their own strengths with occupations, and develop the foundational abilities needed to become working professionals. The class uses interactive, practice-oriented formats and problem-based learning (PBL). For example, students learn through practice such as group discussion, development of the ability to form motivations for applying, and group interviews.

Theme	・Improve employability toward the realization of one's desired career path.		
Course Objectives and Overview	International Career Seminar B aims to cultivate the employability needed to decide one's post-graduation path proactively and actively, and, making use of the characteristics of a seminar, proceeds mainly through exercises. This course in particular aims to cultivate practical skills for job hunting. Because preparation tailored to the individual is important for realizing one's desired career path, starting job-hunting preparation through seminar-style classes advances self-understanding and understanding of companies and enables students to proceed with job hunting in a way they find satisfactory. The class uses interactive, practice-oriented formats and problem-based learning (PBL). For example, students learn through practice such as group discussion, development of the ability to form motivations for applying, group interviews, and individual interviews. In the latter half of the course, fourth-year students who have decided their career paths participate as "career mentors" and give advice and so on.

Grade	G3	Teaching Method	Seminar
Course Category	Faculty of International Studies Specialized Courses		
Theme	Understanding Career Paths and Preparing for and Practicing Career Selection		
Course Objectives and Overview	International Career Seminar B, following International Career Seminar A, aims to cultivate the employability needed to decide one's post-graduation path proactively and actively. Making use of the characteristics of a seminar course, the class proceeds mainly through group work and interactive, practical activities. In this course, while deepening self-understanding and understanding of occupations, students deepen their understanding of society and industry through industry research and company research and develop the perspective to link their own strengths with occupations. The course also emphasizes the development of the ability to view oneself objectively and express oneself logically, and, through practice in preparing application documents, interview exercises, group discussions, and similar activities, cultivates the ability to form motivations for applying and the foundational abilities of a working professional. In addition, this course is positioned as the completion stage of "speaking (interaction)" and "speaking (presentation)," and develops the ability to communicate oneself strategically in interview, discussion, and presentation settings.		
Prerequisites and Notes	Classes center on group work and presentations. In the mixed classes, students are expected to respect differences in cultural background and to seek consensus through dialogue. Students must observe the rules and manners taken for granted in society and participate actively in class.		
Relation to the Diploma Policy (DP)	For the relation between this course and the Diploma Policy (DP), please refer to the following URL. https://www.keiho-u.ac.jp/faculty/taken/curriculummap.html		
Learning Outcomes	Following International Career Seminar A, this course targets international students who are undecided about their future career paths, and aims to help them understand diverse options such as employment, further study, returning home, and continued study, and to make basic preparations for forming a career path suited to their own circumstances. ①Be able to organize one's self-understanding (strengths, interests, constraints, etc.) and put a realistic career direction into words. ②Be able to gather information on industries, occupations, and career paths, and compare and examine options in light of the reliability of the information. ③Be able to practice career exploration that deepens one's interests, aptitudes, and understanding of occupations through experiences such as internships. ④Be able to set goals for the Japanese needed for employment and job hunting (honorific language, written expressions in documents, responses in interviews, etc.) and practice them based on a study plan. ⑤Be able to put one's own anxieties and issues into words and make use of the necessary support resources (inside and outside the university). ⑥Be able to draw up an action plan for career formation and continue small actions (information gathering, consultation, experiences, etc.).

Course Category	Faculty of International Studies Specialized Courses		
Theme	Understanding Career Paths and Preparing for and Practicing Career Selection		
Course Objectives and Overview	International Career Seminar B, following International Career Seminar A, aims to cultivate the employability needed to decide one's post-graduation path proactively and actively. Making use of the characteristics of a seminar course, the class proceeds mainly through group work and interactive, practical activities. In this course, while deepening self-understanding and understanding of occupations, students deepen their understanding of society and industry through industry research and company research and develop the perspective to link their own strengths with occupations. The course also emphasizes the development of the ability to view oneself objectively and express oneself logically, and, through practice in preparing application documents, interview exercises, group discussions, and similar activities, cultivates the ability to form motivations for applying and the foundational abilities of a working professional. In addition, this course is positioned as the completion stage of "speaking (interaction)" and "speaking (presentation)," and develops the ability to communicate oneself strategically in interview, discussion, and presentation settings.		
Prerequisites and Notes	Classes center on group work and presentations. In the mixed classes, students are expected to respect differences in cultural background and to seek consensus through dialogue. Students must observe the rules and manners taken for granted in society and participate actively in class.

Theme	Improve employability toward the realization of one's desired career path.		
Course Objectives and Overview	International Career Seminar C targets international students who aim to find employment in Japan, and aims to cultivate the employability needed to decide one's post-graduation path proactively and actively; making use of the characteristics of a seminar, the class proceeds mainly through group work. This course mainly addresses "understanding of job-hunting circumstances and methodology specific to Japan," "self-analysis," "industry and company research," "drafting a motivation statement," and "interview preparation." Because preparation tailored to the individual is important for realizing one's desired career path, the course aims to advance job-hunting preparation through seminar-style classes and, through self-understanding and understanding of companies, to achieve satisfying job hunting and the realization of one's career path. While acquiring the ability to view oneself objectively and express oneself logically in Japanese, students deepen their knowledge of industry through company research and industry research, form the groundwork for motivation statements that link their own strengths with occupations, and develop the foundational abilities needed to become working professionals. The class uses interactive, practice-oriented formats and problem-based learning (PBL). For example, students learn through practice such as group discussion, development of the ability to form motivations for applying, and group interviews.

Course Category	Faculty of International Studies Specialized Courses		
Theme	Deepen cross-cultural understanding and cultivate a global mindset through work experience in the United States, South Korea, and Southeast Asia.		
Course Objectives and Overview	The Overseas Internship is a program in which students gain work experience at companies and other organizations in the United States, South Korea, and Southeast Asia during the summer vacation period (August and September), when no classes are held. Through training overseas, students develop views of society and of work for their future career paths and choice of occupation, and deepen their understanding of the qualities, attitudes, and values required of global human resources. Attendance at a pre-departure guidance session at the university is required before dispatch to overseas companies, organizations, and business sites. The purpose of the course is to aim at future social and vocational independence by gaining work experience at overseas companies and business sites and linking university learning with practical experience in society.		
Prerequisites and Notes			
Relation to the Diploma Policy (DP)	For the relation between this course and the Diploma Policy (DP), please refer to the following URL. https://www.keiho-u.ac.jp/faculty/taken/curriculummap.html		
Learning Outcomes	By gaining work experience at overseas companies and business sites and linking university study with practical experience in society, students become able to be conscious of future social and vocational independence. Furthermore, through work experience in a cross-cultural society, students deepen their understanding of overseas work styles, the job characteristics of working abroad, and collaboration with local staff, and cultivate the qualities, attitudes, and values required of global human resources. In addition, the course aims at improvement of foreign-language communication skills, cultivation of an international outlook, preparation as a global human resource who can be active overseas, and, ultimately, the ability to be active in a broad field both within Japan and abroad.

Regarding taking this course	Smooth communication on site overseas requires a certain level of foreign-language communication ability. Therefore, depending on the destination country, taking the TOEIC® (the IP version is also acceptable) or TOPIK either before or after the training is strongly recommended. When taking this course, be sure to attend the information session held by the Career Center and understand the basic significance and purpose of the Overseas Internship. Note that, as with internships in Japan, overseas internships strictly require the manners of working members of society. Furthermore, although the security situation in the host regions and countries is relatively stable, bear firmly in mind that it differs from that in Japan. Therefore, approach the entire program with a sense of tension.

Theme	International Studies for Learning in the English Communication Course		
Course Objectives and Overview	This course is a retake course for Foundations for International Studies A, which aims at acquiring the basic knowledge necessary for the objectives of learning in the English Communication Course: "communication skills centered on English," "differences in society and culture across the world's regions," and "cross-cultural understanding and an orientation toward diversity." Accordingly, in this class students acquire the basic fundamentals of the three areas at the core of the course's learning, namely ① English, ② communication, and ③ society/culture, and learn how to view the world from these three areas. The aim is to deepen understanding of the "international studies" perspective as captured by English communication.		
Prerequisites and Notes	This is a retake course for "Foundations for International Studies A" (required course), in which basic knowledge of international studies is acquired. All students take it in the first year together with "Foundations for International Studies B." "Foundations for International Studies A" contributes to forming the foundation of the English Communication Course, in which students mainly study courses in the fields of advanced foreign language, communication, society and culture, and tourism and hospitality, in order to acquire communication skills centered on internationally valid English ability and, using knowledge of society and culture, to grasp global issues and the issues of individual countries and regions and develop the ability to work toward solving them. For each session, a questionnaire for preparation and a confirmation test to consolidate learning are assigned as out-of-class tasks, so be sure to submit them.		
Relation to the Diploma Policy (DP)	For the relation between this course and the Diploma Policy (DP), please refer to the following URL. https://www.keiho-u.ac.jp/faculty/taken/curriculummap.html		
Learning Outcomes	The goal of "Foundations for International Studies A" and "Foundations for International Studies B" is to acquire the perspective (theory) of "international studies" that runs through the composite, multidisciplinary learning of the Faculty of International Studies. In "Foundations for International Studies A," ・Be able to understand the differences among the three areas of ① the world seen through English, ② communication, and ③ society/culture, and acquire the basic knowledge underlying those three areas. ・By acquiring learning in the three areas of ① the world seen through English, ② communication, and ③ society/culture, be able to acquire a "way of seeing" the world and a "method" for knowing the world. ・Using the three areas and basic knowledge of Foundations for International Studies A, be able to select an appropriate course at the time of advancement to the second year in line with one's own interests and desired career path.		
Correspondence to Qualifications and Certification Exams			
Method of Feedback	In-class confirmation tests are given to check preparation and to remind students of the problem awareness shown in preparation, and feedback is given at each session. Feedback is given in class based on the results of the out-of-class confirmation tests for each session, which are administered using the test function of the Learning

Theme	Thinking about Globalization in the Asia-Pacific from the Perspectives of Law and Politics, Economics, and Management		
Course Objectives and Overview	Within international studies, this course examines the various issues of the Asia-Pacific region from the perspectives of law and politics, economics, and management. Specifically, students learn the methods (theories of law and politics, economics, and management) and basic knowledge for interpreting what international society is and how states, companies, individuals, and others judge and act. Afterward, they examine the issues of the Asia-Pacific region by combining these methods of interpretation with basic knowledge. Through the above, students understand the "international studies" perspective learned in the Asia-Pacific Course.

Theme	Understand and discuss in English the various problems of an increasingly globalized international society, and think about a society of coexistence.		
Course Objectives and Overview	The purpose of this course is to read texts and media information in English on the various problems of a society undergoing globalization. By understanding and discussing the world's issues with the SDGs (Sustainable Development Goals), which were set by the United Nations and draw worldwide attention, as the axis, students improve their four English skills. In addition, by studying various problems with a sense of awareness as a member of international society, students cultivate international understanding, cross-cultural understanding, and an international sensibility. By improving English proficiency and also acquiring the basic knowledge, background, and awareness of issues needed to think about and survive in the society of coexistence to come, students become able to discuss and act in a developmental way on various issues, and their communication skills overseas improve.

Theme	Deepen understanding of Korean society and culture and cultivate the foundations for international exchange.		
Course Objectives and Overview	In this course, students learn broadly about changes in society and culture in modern Korean history. Specifically, themes such as anti-communism in Korea, the process of economic development, issues of gender and sexuality, the history of civic movements, and art history are taken up, and the characteristics of each social phenomenon and cultural product and people's experiences are examined in relation to the context of modern Korean history. In addition, to supplement the macro-level lecture content and let students feel the micro-level lives of the people who lived through modern Korean history, related novels, films, dramas, manga, books, and documentaries are introduced. In each class, true/false quizzes, discussions (group work) in which students state their own experiences and perspectives, and the writing of comment papers are incorporated as needed.		
Prerequisites and Notes	Please participate actively in every class. In class, worksheets, group work, quizzes, comment sheets, presentations, and discussions are carried out. Participation in class is evaluated on the basis of participation in these activities and submissions. Quizzes in class are also reflected in grades. Even if attendance is recorded through the student ID card, if participation in or submission of in-class activities (worksheets, group work, quizzes, comment sheets, etc.) cannot be confirmed, it cannot be evaluated as "participation and engagement in class."		
Relation to the Diploma Policy (DP)	For the relation between this course and the Diploma Policy (DP), please refer to the following URL. https://www.keiho-u.ac.jp/faculty/taken/curriculummap.html		
Learning Outcomes	1. Understand the changes in society and culture in modern Korean history and be able to explain them in one's own words. 2. Compare the society and culture of Korea with those of one's own country/home country and examine them critically.

Regarding taking this course	● Fourteen sessions will be held face-to-face (the 15th session will be delivered on demand). [Details of Grading Methods and Criteria] ● "Active participation and engagement in class (50%)" is evaluated based on attitude toward participation in class and the preparation and submission of comment papers and worksheets. Each session is scored out of 50 points, and the average score (of 15 sessions) is reflected in the grade. (* If you are absent once, your score for that session will be 0, so please be aware of this. If you must be absent for unavoidable reasons, please contact the instructor in advance.) ● "Quizzes, report assignments, etc. during the course period (20%)" include quizzes given in class. Details will be explained in class. ● "Final examination: report (30%)" involves choosing a work from among those introduced in class (a list of works will be distributed) and writing a report (reflection essay). How to write the report will be explained in class.

Regarding taking this course	The first step in area studies is an interest in the target country or region. The Faculty of International Studies plans to conduct Field Projects in Korea and Malaysia during the summer vacation of 2025. It is necessary to learn about the target countries before going on a Field Project. Please attend with enthusiasm. In this course, grades are determined by active attitude in class and an end-of-semester report. For the end-of-semester report, students submit approximately 4,000 characters on what aspect of Korean or Malaysian politics, economy, society, or culture they became interested in through the course and what they would like to investigate (or have learned) in the Field Project.

Regarding taking this course	Management strategy is the most important factor in explaining corporate behavior. This is because it is no exaggeration to say that the management strategy formulated by managers determines the success or failure of a company's survival. Management strategy requires the ability to recognize, interpret, and judge both environmental change (external factors) and the company's own organizational capabilities (internal factors). For that reason, sufficient understanding and insight into the organization's external and internal factors are necessary.

Theme	Strengthening Basic Skills in Vocabulary, Grammar, Reading, and Listening Comprehension as English Proficiency for Improving TOEIC Scores		
Course Objectives and Overview	This course meets twice a week and aims ① to strengthen overall English proficiency and ② to improve scores on the TOEIC test. In ①, students work to consolidate receptive knowledge of the 1,500 high-frequency words and the basic grammatical items needed to understand English. In class, students build knowledge through input from the textbook and vocabulary-learning materials and consolidate it through exercises and output activities, with the aim of becoming able to read and listen to simple sentences and to compound and complex sentences with a clear structure. In ②, by working on TOEIC practice problems, students refine the knowledge acquired in ① into knowledge that can be used on the test. In addition, from the perspective of fostering employability, the course develops logical thinking and a broad outlook and, positioning the TOEIC as a benchmark of international applicability, enables students to acquire English proficiency, including English skills usable in international society.

Regarding taking this course	To be active in a global society, English proficiency as a tool of communication is necessary. In addition, to acquire practical English proficiency, an environment in which you are constantly exposed to English is necessary. In class, while solidifying the fundamentals of English through study that builds basic English abilities, students develop applied skills through reading exercises. Many assignments are given in every class. By advancing study not only in class but also outside class, such as building vocabulary through study based on the NGSL, checking English grammar, and preparing for and reviewing reading problems, cultivate the habit of independent study. Participate actively in class and speak up. To confirm and evaluate learning outcomes, students take the TOEIC IP test administered each semester.

Theme	Strengthening Basic Skills in Vocabulary, Grammar, Reading, and Listening Comprehension as English Proficiency for Improving TOEIC Scores		
Course Objectives and Overview	This course meets twice a week and aims ① to strengthen overall English proficiency and ② to improve scores on the TOEIC test. In ①, students work to consolidate receptive knowledge of the 1,500 high-frequency words and the basic grammatical items needed to understand English. In class, students build knowledge through input from the textbook and vocabulary-learning materials and consolidate it through exercises and output activities, with the aim of becoming able to read and listen to simple sentences and to compound and complex sentences with a clear structure. In ②, by working on TOEIC practice problems, students refine the knowledge acquired in ① into knowledge that can be used on the test. In addition, from the perspective of fostering employability, the course develops logical thinking and a broad outlook and, positioning the TOEIC as a benchmark of international applicability, enables students to acquire English proficiency, including English skills usable in international society.

Regarding taking this course	To be active in a global society, English proficiency as a tool of communication is necessary. In addition, to acquire practical English proficiency, an environment in which you are constantly exposed to English is necessary. In class, while solidifying the fundamentals of English through study that builds basic English abilities, students develop applied skills through reading exercises. Many assignments are given in every class. By advancing study not only in class but also outside class, such as building vocabulary through study based on the NGSL, checking English grammar, and preparing for and reviewing reading problems, cultivate the habit of independent study. Participate actively in class and speak up. To confirm and evaluate learning outcomes, students take the TOEIC IP test administered each semester.

Theme	Strengthening Basic Skills in Vocabulary, Grammar, and Reading as English Proficiency for Improving TOEIC Scores		
Course Objectives and Overview	This course aims to improve TOEIC scores by improving vocabulary, grammar, and reading ability. Specifically, in class students first work to strengthen vocabulary and acquire correct knowledge of grammar; through reading English articles written on a variety of contemporary social themes, they become accustomed to reading English, learn to find keywords and key phrases, and, through the consolidation of grammatical knowledge and repeated output, become able to read more accurately. In addition, from the perspective of fostering employability, the course develops logical thinking and a broad outlook and, positioning the TOEIC as a benchmark of international applicability, enables students to acquire English proficiency, including English skills usable in international society.

Learning Outcomes	By strengthening vocabulary and correctly understanding grammar, students develop the ability to read English texts in a variety of fields. In addition, based on an understanding of basic English sentence structure, students repeat practice exercises and develop the ability to read and interpret English texts using the vocabulary and grammatical knowledge they have acquired. The goals of the course are: ① to thoroughly understand the basic level of English and be able to write basic English sentences using that knowledge (grammar/vocabulary); ② to read a wide range of English texts, expand vocabulary, and understand the structure and content of English sentences; and ③ to improve TOEIC scores.

Theme	Strengthening Basic Skills in Vocabulary, Grammar, Reading, and Listening Comprehension as English Proficiency for Improving TOEIC Scores		
Course Objectives and Overview	This course meets twice a week and aims ① to strengthen overall English proficiency and ② to improve scores on the TOEIC test. In ①, students work to consolidate receptive knowledge of the 1,500 high-frequency words and the basic grammatical items needed to understand English. In class, students build knowledge through input from the textbook and vocabulary-learning materials and consolidate it through exercises and output activities, with the aim of becoming able to read and listen to simple sentences and to compound and complex sentences with a clear structure. In ②, by working on TOEIC practice problems, students refine the knowledge acquired in ① into knowledge that can be used on the test. In addition, from the perspective of fostering employability, the course develops logical thinking and a broad outlook and, positioning the TOEIC as a benchmark of international applicability, enables students to acquire English proficiency, including English skills usable in international society.

Regarding taking this course	To be active in a global society, English proficiency as a tool of communication is necessary. In addition, to acquire practical English proficiency, an environment in which you are constantly exposed to English is necessary. In class, while solidifying the fundamentals of English through study that builds basic English abilities, students develop applied skills through reading exercises. Many assignments are given in every class. By advancing study not only in class but also outside class, such as building vocabulary through study based on the NGSL, checking English grammar, and preparing for and reviewing TOEIC problems, cultivate the habit of independent study. Participate actively in class and speak up. To measure learning outcomes, students take the TOEIC IP test administered each semester.

Theme	Strengthening Basic Skills in Vocabulary, Grammar, and Reading as English Proficiency for Improving TOEIC Scores		
Course Objectives and Overview	This course aims to improve TOEIC scores by improving vocabulary, grammar, and reading ability. Specifically, in class students first work to strengthen vocabulary and acquire correct knowledge of grammar; through reading English articles written on a variety of contemporary social themes, they become accustomed to reading English, learn to find keywords and key phrases, and, through the consolidation of grammatical knowledge and repeated output, become able to read more accurately. In addition, from the perspective of fostering employability, the course develops logical thinking and a broad outlook and, positioning the TOEIC as a benchmark of international applicability, enables students to acquire English proficiency, including English skills usable in international society.

Learning Outcomes	By strengthening vocabulary and correctly understanding grammar, students develop the ability to read English texts in a variety of fields. In addition, based on an understanding of basic English sentence structure, students repeat practice exercises and develop the ability to read and interpret English texts using the vocabulary and grammatical knowledge they have acquired. The goals of the course are: ① not only to thoroughly understand the basic level of English but also to be able to write complex English sentences using that knowledge (grammar/vocabulary); ② to read a wide range of English texts, expand vocabulary, and understand the structure and content of English sentences; and ③ to improve TOEIC scores.

Regarding taking this course	To be active in a global society, English proficiency as a tool of communication is necessary. In addition, to acquire practical English proficiency, an environment in which you are constantly exposed to English is necessary. In class, while solidifying the fundamentals of English through study that builds basic English abilities, students develop applied skills through reading exercises. Many assignments are given in every class. By advancing study not only in class but also outside class, such as building vocabulary, checking English grammar, and preparing for and reviewing reading problems, cultivate the habit of independent study.

Course Category	Faculty of International Studies Specialized Courses		
Theme	Strengthening basic knowledge and developing practical skills, centered on English listening comprehension, conversation, grammar, and vocabulary		
Course Objectives and Overview	In preparation for future activities such as overseas and study-abroad experiences, international exchange, and the workplace, students develop speaking ability and conversational skills. In particular, the emphasis is on converting “words whose meaning one understands” (receptive vocabulary, passive vocabulary) into “words one can use in conversation” (productive vocabulary, active vocabulary). Students practice basic vocabulary, expressions, and sentence patterns and actually use them in activities such as role-plays, firmly acquiring speaking skills. In addition, through the speaking assignments and quizzes carried out in class, students grasp their own speaking ability and aim to improve it continuously by setting goals. Evaluation is conducted in a form directly tied to what is covered in class, and the course is designed so that learning outcomes are clearly visualized. The aim is for students to grow into people who can act proactively in international environments and diverse workplaces in the future and communicate practically in English while collaborating with others.		
Prerequisites and Notes	Bring an English-Japanese dictionary, an electronic dictionary, or a smartphone or similar device with a dictionary function to class. Use of smartphones and similar devices during class is permitted only for learning purposes. Except when following the instructor’s instructions, such as for dictionary searches and completing assignments, personal use (social media, etc.) is prohibited.		
Relation to the Diploma Policy (DP)	For the relation between this course and the Diploma Policy (DP), please refer to the following URL. https://www.keiho-u.ac.jp/faculty/taken/curriculummap.html		
Learning Outcomes	In preparation for future activities such as overseas and study-abroad experiences, international exchange, and the workplace, students develop speaking ability and conversational skills. Through the speaking activities in class, students become able to convey their own thoughts and information in basic English.

Course Category	Faculty of International Studies Specialized Courses		
Theme	Strengthening basic knowledge and developing practical skills, centered on English listening comprehension, conversation, grammar, and vocabulary		
Course Objectives and Overview	In preparation for future activities such as overseas and study-abroad experiences, international exchange, and the workplace, students develop speaking ability and conversational skills. In particular, the emphasis is on converting “words whose meaning one understands” (receptive vocabulary, passive vocabulary) into “words one can use in conversation” (productive vocabulary, active vocabulary). Students practice basic vocabulary, expressions, and sentence patterns and actually use them in activities such as role-plays, firmly acquiring speaking skills. In addition, through the speaking assignments and quizzes carried out in class, students grasp their own speaking ability and aim to improve it continuously by setting goals. Evaluation is conducted in a form directly tied to what is covered in class, and the course is designed so that learning outcomes are clearly visualized. The aim is for students to grow into people who can act proactively in international environments and diverse workplaces in the future and communicate practically in English while collaborating with others.		
Prerequisites and Notes	Bring an English-Japanese dictionary, an electronic dictionary, or a smartphone or similar device with a dictionary function to class. Use of smartphones and similar devices during class is permitted only for learning purposes. Except when following the instructor’s instructions, such as for dictionary searches and completing assignments, personal use (social media, etc.) is prohibited.

Course Category	Faculty of International Studies Specialized Courses		
Theme	Strengthening basic knowledge and developing practical skills, centered on English listening comprehension, conversation, grammar, and vocabulary		
Course Objectives and Overview	In preparation for future activities such as overseas and study-abroad experiences, international exchange, and the workplace, students develop speaking ability and conversational skills. In particular, the emphasis is on converting “words whose meaning one understands” (receptive vocabulary, passive vocabulary) into “words one can use in conversation” (productive vocabulary, active vocabulary). Students practice basic vocabulary, expressions, and sentence patterns and actually use them in activities such as role-plays, firmly acquiring speaking skills. In addition, through the speaking assignments and quizzes carried out in class, students grasp their own speaking ability and aim to improve it continuously by setting goals. Evaluation is conducted in a form directly tied to what is covered in class, and the course is designed so that learning outcomes are clearly visualized. The aim is for students to grow into people who can act proactively in international environments and diverse workplaces in the future and communicate practically in English while collaborating with others.		
Prerequisites and Notes	Bring an English-Japanese dictionary, an electronic dictionary, or a smartphone or similar device with a dictionary function to class. Use of smartphones and similar devices during class is permitted only for learning purposes. Except when following the instructor’s instructions, such as for dictionary searches and completing assignments, personal use (social media, etc.) is prohibited.		
Relation to the Diploma Policy (DP)	For the relation between this course and the Diploma Policy (DP), please refer to the following URL. https://www.keiho-u.ac.jp/faculty/taken/curriculummap.html		
Learning Outcomes	In preparation for future activities such as overseas and study-abroad experiences, international exchange, and the workplace, students develop speaking ability and conversational skills. Students aim to improve through the speaking activities and evaluation conducted in class.

Course Category	Faculty of International Studies Specialized Courses		
Theme	Strengthening basic knowledge and developing operational skills, centered on English listening comprehension, conversation, grammar, and vocabulary		
Course Objectives and Overview	In preparation for future activities such as overseas and study-abroad experiences, international exchange, and the workplace, students develop speaking ability and conversational skills. In particular, the emphasis is on converting “words whose meaning one understands” (receptive vocabulary, passive vocabulary) into “words one can use in conversation” (productive vocabulary, active vocabulary). Students practice basic vocabulary, expressions, and sentence patterns and actually use them in activities such as role-plays, firmly acquiring speaking skills. In addition, through the speaking assignments and quizzes carried out in class, students grasp their own speaking ability and aim to improve it continuously by setting goals. Evaluation is conducted in a form directly tied to what is covered in class, and the course is designed so that learning outcomes are clearly visualized. The aim is for students to grow into people who can act proactively in international environments and diverse workplaces in the future and communicate practically in English while collaborating with others.		
Prerequisites and Notes	Bring an English-Japanese dictionary, an electronic dictionary, or a smartphone or similar device with a dictionary function to class. Use of smartphones and similar devices during class is permitted only for learning purposes. Except when following the instructor’s instructions, such as for dictionary searches and completing assignments, personal use (social media, etc.) is prohibited.		
Relation to the Diploma Policy (DP)	For the relation between this course and the Diploma Policy (DP), please refer to the following URL. https://www.keiho-u.ac.jp/faculty/taken/curriculummap.html		
Learning Outcomes	In preparation for future activities such as overseas and study-abroad experiences, international exchange, and the workplace, students develop speaking ability and conversational skills. Through the speaking activities in class, students become able to convey their own thoughts and information in basic English.

Theme	Strengthening Basic Skills in Vocabulary, Grammar, Reading, and Listening Comprehension as English Proficiency for Improving TOEIC Scores		
Course Objectives and Overview	This course meets twice a week and aims ① to strengthen overall English proficiency and ② to improve scores on the TOEIC test. In ①, students work to consolidate receptive knowledge of the 3,000 high-frequency words and the basic grammatical items needed to understand English. In class, students build knowledge through input from the textbook and vocabulary-learning materials and consolidate it through exercises and output activities, with the aim of becoming able to read and listen to simple sentences and to compound and complex sentences with a clear structure. In ②, by working on TOEIC practice problems, students refine the knowledge acquired in ① into knowledge that can be used on the test. In addition, from the perspective of fostering employability, the course develops logical thinking and a broad outlook and, positioning the TOEIC as a benchmark of international applicability, enables students to acquire English proficiency, including English skills usable in international society.

Regarding taking this course	To be active in a global society, English proficiency as a tool of communication is necessary. In addition, to acquire practical English proficiency, an environment in which you are constantly exposed to English is necessary. In class, while solidifying the fundamentals of English through study that builds basic English abilities, students develop applied skills through reading exercises. Many assignments are given in every class. By advancing study not only in class but also outside class, such as building vocabulary through study based on the NGSL, checking English grammar, and preparing for and reviewing reading problems, cultivate the habit of independent study. Participate actively in class and speak up. To confirm and evaluate learning outcomes, students take the TOEIC IP test administered each semester.

Theme	Strengthening Basic Skills in Vocabulary, Grammar, Reading, and Listening Comprehension as English Proficiency for Improving TOEIC Scores		
Course Objectives and Overview	This course meets twice a week and aims ① to strengthen overall English proficiency and ② to improve scores on the TOEIC test. In ①, students work to consolidate receptive knowledge of the 3,000 high-frequency words and the basic grammatical items needed to understand English. In class, students build knowledge through input from the textbook and vocabulary-learning materials and consolidate it through exercises and output activities, with the aim of becoming able to read and listen to simple sentences and to compound and complex sentences with a clear structure. In ②, by working on TOEIC practice problems, students refine the knowledge acquired in ① into knowledge that can be used on the test. In addition, from the perspective of fostering employability, the course develops logical thinking and a broad outlook and, positioning the TOEIC as a benchmark of international applicability, enables students to acquire English proficiency, including English skills usable in international society.

Theme	Strengthening Basic Skills in Vocabulary, Grammar, Reading, and Listening Comprehension as English Proficiency for Improving TOEIC Scores		
Course Objectives and Overview	This course meets twice a week and aims ① to strengthen overall English proficiency and ② to improve scores on the TOEIC test. In ①, students work to consolidate receptive knowledge of the 3,000 high-frequency words and the basic grammatical items needed to understand English. In class, students build knowledge through input from the textbook and vocabulary-learning materials and consolidate it through exercises and output activities, with the aim of becoming able to read and listen to simple sentences and to compound and complex sentences with a clear structure. In ②, by working on TOEIC practice problems, students refine the knowledge acquired in ① into knowledge that can be used on the test. In addition, from the perspective of fostering employability, the course develops logical thinking and a broad outlook and, positioning the TOEIC as a benchmark of international applicability, enables students to acquire English proficiency, including English skills usable in international society.

Regarding taking this course	To be active in a global society, English proficiency as a tool of communication is necessary. In addition, to acquire practical English proficiency, an environment in which you are constantly exposed to English is necessary. In class, while solidifying the fundamentals of English through study that builds basic English abilities, students develop applied skills through reading exercises. Many assignments are given in every class. By advancing study not only in class but also outside class, such as building vocabulary through study based on the NGSL, checking English grammar, and preparing for and reviewing reading problems, cultivate the habit of independent study. Participate actively in class and speak up. To confirm and evaluate learning outcomes, students take the TOEIC IP test administered each semester.

Theme	Strengthening English reading comprehension through paragraph reading and listening ability through output, and building vocabulary and expressive ability, with a view to raising TOEIC scores		
Course Objectives and Overview	Students learn the fundamentals of English paragraph reading and strengthen their listening ability through repeated output. By reading English texts with attention to their structure, students aim to acquire reading comprehension that allows them to grasp part or all of an English text without translating it sentence by sentence into Japanese. At the same time, students build their listening skills through listening exercises and improve their vocabulary and English expressive ability. In addition, from the perspective of fostering employability, the course develops logical thinking and a broad outlook and, positioning the TOEIC as a benchmark of international applicability, enables students to acquire English proficiency, including English skills usable in international society.

Theme	Strengthening Basic Skills in Vocabulary, Grammar, Reading, and Listening Comprehension as English Proficiency for Improving TOEIC Scores		
Course Objectives and Overview	This course meets twice a week and aims ① to strengthen overall English proficiency and ② to improve scores on the TOEIC test. In ①, students work to consolidate receptive knowledge of the 3,000 high-frequency words and the basic grammatical items needed to understand English. In class, students build knowledge through input from the textbook and vocabulary-learning materials and consolidate it through exercises and output activities, with the aim of becoming able to read and listen to simple sentences and to compound and complex sentences with a clear structure. In ②, by working on TOEIC practice problems, students refine the knowledge acquired in ① into knowledge that can be used on the test. In addition, from the perspective of fostering employability, the course develops logical thinking and a broad outlook and, positioning the TOEIC as a benchmark of international applicability, enables students to acquire English proficiency, including English skills usable in international society.

Regarding taking this course	To be active in a global society, English proficiency as a tool of communication is necessary. In addition, to acquire practical English proficiency, an environment in which you are constantly exposed to English is necessary. In class, while solidifying the fundamentals of English through study that builds basic English abilities, students develop applied skills through reading exercises. Many assignments are given in every class. By advancing study not only in class but also outside class, such as building vocabulary through study based on the NGSL, checking English grammar, and preparing for and reviewing reading problems, cultivate the habit of independent study. Participate actively in class and speak up. To confirm and evaluate learning outcomes, students take the TOEIC IP test administered each semester.

Theme	Strengthening Basic Skills in Vocabulary, Grammar, Reading, and Listening Comprehension as English Proficiency for Improving TOEIC Scores		
Course Objectives and Overview	This course meets twice a week and aims ① to strengthen overall English proficiency and ② to improve scores on the TOEIC test. In ①, students work to consolidate receptive knowledge of the 3,000 high-frequency words and the basic grammatical items needed to understand English. In class, students build knowledge through input from the textbook and vocabulary-learning materials and consolidate it through exercises and output activities, with the aim of becoming able to read and listen to simple sentences and to compound and complex sentences with a clear structure. In ②, by working on TOEIC practice problems, students refine the knowledge acquired in ① into knowledge that can be used on the test. In addition, from the perspective of fostering employability, the course develops logical thinking and a broad outlook and, positioning the TOEIC as a benchmark of international applicability, enables students to acquire English proficiency, including English skills usable in international society.

Course Category	Faculty of International Studies Specialized Courses		
Theme	Strengthening English reading comprehension through paragraph reading and listening ability through output, and building vocabulary and expressive ability, with a view to raising TOEIC scores		
Course Objectives and Overview	Students learn the fundamentals of English paragraph reading and strengthen their listening ability through repeated output. By reading English texts with attention to their structure, students aim to acquire reading comprehension that allows them to grasp part or all of an English text without translating it sentence by sentence into Japanese. At the same time, students build their listening skills through listening exercises and improve their vocabulary and English expressive ability. In addition, from the perspective of fostering employability, the course develops logical thinking and a broad outlook and, positioning the TOEIC as a benchmark of international applicability, enables students to acquire English proficiency, including English skills usable in international society.

Regarding taking this course	To be active in a global society, English proficiency as a communication tool is necessary. Moreover, to acquire practical English ability, an environment in which one is constantly exposed to English is needed. In class, students solidify the fundamentals of English through study that builds basic English ability, while cultivating applied skills through reading exercises. Many assignments are given in every class. By advancing their study not only in class but also outside of class, such as building vocabulary, checking English grammar, and preparing and reviewing for reading questions, students should develop the habit of independent study. Please participate actively in class and speak up.

Theme	Strengthening basic knowledge and developing practical skills, centered on English listening comprehension, conversation, grammar, and vocabulary		
Course Objectives and Overview	In preparation for future activities such as overseas and study-abroad experiences, international exchange, and the workplace, students develop speaking ability and conversational skills. In particular, the emphasis is on converting “words whose meaning one understands” (receptive vocabulary, passive vocabulary) into “words one can use in conversation” (productive vocabulary, active vocabulary). Students practice basic vocabulary, expressions, and sentence patterns and actually use them in activities such as role-plays, firmly acquiring speaking skills. In addition, through the speaking assignments and quizzes carried out in class, students grasp their own speaking ability and aim to improve it continuously by setting goals. Evaluation is conducted in a form directly tied to what is covered in class, and the course is designed so that learning outcomes are clearly visualized. The aim is for students to grow into people who can act proactively in international environments and diverse workplaces in the future and communicate practically in English while collaborating with others.		
Prerequisites and Notes	Bring an English-Japanese dictionary, an electronic dictionary, or a smartphone or similar device with a dictionary function to class. Use of smartphones and similar devices during class is permitted only for learning purposes. Except when following the instructor’s instructions, such as for dictionary searches and completing assignments, personal use (social media, etc.) is prohibited.

Course Category	Faculty of International Studies Specialized Courses		
Theme	Strengthening basic knowledge and developing practical skills, centered on English listening comprehension, conversation, grammar, and vocabulary		
Course Objectives and Overview	In preparation for future activities such as overseas and study-abroad experiences, international exchange, and the workplace, students develop speaking ability and conversational skills. In particular, the emphasis is on converting “words whose meaning one understands” (receptive vocabulary, passive vocabulary) into “words one can use in conversation” (productive vocabulary, active vocabulary). Students practice basic vocabulary, expressions, and sentence patterns and actually use them in activities such as role-plays, firmly acquiring speaking skills. In addition, through the speaking assignments and quizzes carried out in class, students grasp their own speaking ability and aim to improve it continuously by setting goals. Evaluation is conducted in a form directly tied to what is covered in class, and the course is designed so that learning outcomes are clearly visualized. The aim is for students to grow into people who can act proactively in international environments and diverse workplaces in the future and communicate practically in English while collaborating with others.		
Prerequisites and Notes	Bring an English-Japanese dictionary, an electronic dictionary, or a smartphone or similar device with a dictionary function to class. Use of smartphones and similar devices during class is permitted only for learning purposes. Except when following the instructor’s instructions, such as for dictionary searches and completing assignments, personal use (social media, etc.) is prohibited.

Course Category	Faculty of International Studies Specialized Courses		
Theme	Strengthening basic knowledge and developing practical skills, centered on English listening comprehension, conversation, grammar, and vocabulary		
Course Objectives and Overview	In preparation for future activities such as overseas and study-abroad experiences, international exchange, and the workplace, students develop speaking ability and conversational skills. In particular, the emphasis is on converting “words whose meaning one understands” (receptive vocabulary, passive vocabulary) into “words one can use in conversation” (productive vocabulary, active vocabulary). Students practice basic vocabulary, expressions, and sentence patterns and actually use them in activities such as role-plays, firmly acquiring speaking skills. In addition, through the speaking assignments and quizzes carried out in class, students grasp their own speaking ability and aim to improve it continuously by setting goals. Evaluation is conducted in a form directly tied to what is covered in class, and the course is designed so that learning outcomes are clearly visualized. The aim is for students to grow into people who can act proactively in international environments and diverse workplaces in the future and communicate practically in English while collaborating with others.		
Prerequisites and Notes	Bring an English-Japanese dictionary, an electronic dictionary, or a smartphone or similar device with a dictionary function to class. Use of smartphones and similar devices during class is permitted only for learning purposes. Except when following the instructor’s instructions, such as for dictionary searches and completing assignments, personal use (social media, etc.) is prohibited.

Grade	G2	Teaching Method	Lecture
Course Category	Faculty of International Studies Specialized Courses		
Theme	Strengthening basic knowledge and developing practical skills, centered on English listening comprehension, conversation, grammar, and vocabulary.		
Course Objectives and Overview	In preparation for future activities such as overseas and study-abroad experiences, international exchange, and the workplace, students develop speaking ability and conversational skills. In particular, the emphasis is on converting “words whose meaning one understands” (receptive vocabulary, passive vocabulary) into “words one can use in conversation” (productive vocabulary, active vocabulary). Students practice basic vocabulary, expressions, and sentence patterns and actually use them in activities such as role-plays, firmly acquiring speaking skills. In addition, through the speaking assignments and quizzes carried out in class, students grasp their own speaking ability and aim to improve it continuously by setting goals. Evaluation is conducted in a form directly tied to what is covered in class, and the course is designed so that learning outcomes are clearly visualized. The aim is for students to grow into people who can act proactively in international environments and diverse workplaces in the future and communicate practically in English while collaborating with others.		
Prerequisites and Notes	Bring an English-Japanese dictionary, an electronic dictionary, or a smartphone or similar device with a dictionary function to class. Use of smartphones and similar devices during class is permitted only for learning purposes. Except when following the instructor’s instructions, such as for dictionary searches and completing assignments, personal use (social media, etc.) is prohibited.

Theme	Strengthening basic knowledge and developing practical skills, centered on English listening comprehension, conversation, grammar, and vocabulary.		
Course Objectives and Overview	In preparation for future activities such as overseas and study-abroad experiences, international exchange, and the workplace, students develop speaking ability and conversational skills. In particular, the emphasis is on converting “words whose meaning one understands” (receptive vocabulary, passive vocabulary) into “words one can use in conversation” (productive vocabulary, active vocabulary). Students practice basic vocabulary, expressions, and sentence patterns and actually use them in activities such as role-plays, firmly acquiring speaking skills. In addition, through the speaking assignments and quizzes carried out in class, students grasp their own speaking ability and aim to improve it continuously by setting goals. Evaluation is conducted in a form directly tied to what is covered in class, and the course is designed so that learning outcomes are clearly visualized. The aim is for students to grow into people who can act proactively in international environments and diverse workplaces in the future and communicate practically in English while collaborating with others.		
Prerequisites and Notes	Bring an English-Japanese dictionary, an electronic dictionary, or a smartphone or similar device with a dictionary function to class. Use of smartphones and similar devices during class is permitted only for learning purposes. Except when following the instructor’s instructions, such as for dictionary searches and completing assignments, personal use (social media, etc.) is prohibited.

Regarding taking this course	In Korean II, students gradually practice “speaking” and “interacting” while using what they learned in Korean I. It is perfectly fine if you cannot speak well at first. What matters is to take on challenges without fearing mistakes. Through conversation practice and role-plays in class, let us enjoy acquiring practical Korean.

Course Category	Faculty of International Studies Specialized Courses		
Theme	Study a variety of topics in English and acquire advanced English proficiency that integrates the four skills.		
Course Objectives and Overview	This course meets twice a week and aims ① to strengthen overall English proficiency and ② to improve scores on the TOEIC test. In ①, the aim is to consolidate receptive knowledge of the basic grammatical items needed to understand English and to improve the ability to express oneself in English by applying that knowledge. In class, students build knowledge through input from the textbook and other learning materials and consolidate it through exercises and output activities, with the aim of becoming able to read and listen so as to grasp the meaning accurately even in compound and complex sentences. In ②, by working on TOEIC practice problems alongside the study of 700 high-frequency words, students refine the knowledge acquired in ① into knowledge that can be used on the test. In addition, from the perspective of fostering employability, the course develops logical thinking and a broad outlook and, positioning the TOEIC as a benchmark of international applicability, enables students to acquire English proficiency, including English skills usable in international society.		
Prerequisites and Notes	This course is required for students who enrolled in academic year 2023 or later and belong to the English Communication Course. It is not required for students belonging to the Asia-Pacific Course, but they are encouraged to take it actively in order to improve their English proficiency and raise their TOEIC scores, which are learning goals of the Faculty of International Studies.

Regarding taking this course	The goal of this course is to improve comprehensive English proficiency. Improving it comprehensively, that is, improving all four skills, requires an attitude of thinking for oneself, acting for oneself, and learning for oneself. Through the course, think and speak actively, and pursue the learning needed to acquire "usable English." Comprehensive learning based on English will not only raise your English proficiency by a level but also be of great help in becoming the kind of person who is needed in international society.

Course Category	Faculty of International Studies Specialized Courses		
Theme	Study a variety of topics in English and acquire advanced English proficiency that integrates the four skills.		
Course Objectives and Overview	This course meets twice a week and aims ① to strengthen overall English proficiency and ② to improve scores on the TOEIC test. In ①, the aim is to consolidate receptive knowledge of the basic grammatical items needed to understand English and to improve the ability to express oneself in English by applying that knowledge. In class, students build knowledge through input from the textbook and other learning materials and consolidate it through exercises and output activities, with the aim of becoming able to read and listen so as to grasp the meaning accurately even in compound and complex sentences. In ②, by working on TOEIC practice problems alongside the study of 700 high-frequency words, students refine the knowledge acquired in ① into knowledge that can be used on the test. In addition, from the perspective of fostering employability, the course develops logical thinking and a broad outlook and, positioning the TOEIC as a benchmark of international applicability, enables students to acquire English proficiency, including English skills usable in international society.		
Prerequisites and Notes	This course is required for students who enrolled in academic year 2023 or later and belong to the English Communication Course. It is not required for students belonging to the Asia-Pacific Course, but they are encouraged to take it actively in order to improve their English proficiency and raise their TOEIC scores, which are learning goals of the Faculty of International Studies.

[Grammar and Vocabulary] 1. Notice the grammar and vocabulary covered in class when they appear in a text, and understand their meaning. 2. Be able to answer 70% or more correctly on the quizzes on high-frequency words given in each class. 3. Be able to answer 70% or more correctly on tests of explicit knowledge of the grammar, vocabulary, and textbook content covered in class. 3. Acquire explicit knowledge of the grammar and vocabulary covered in class and be able to explain it to others. 4. Be able to write sentences and passages with correct grammar and usage, using the grammar and vocabulary covered in class. [Long Passages] 1. Be able to understand a coherent text composed of the grammar and vocabulary covered in class and summarize it. 2. Be able to understand a coherent text composed only of the grammar and vocabulary covered in class and convey it to others, adding one's own opinions. [Output] 1. Be able to pronounce the vocabulary and sentences covered in class accurately and naturally, as in English.

Course Numbering	For course numbering, please refer to the following URL. https://www.keiho-u.ac.jp/faculty/taken/numbering.html	Credits	2 Credits
Grade	G3	Teaching Method	Lecture
Course Category	Faculty of International Studies Specialized Courses		
Theme	Study a variety of topics in English and acquire advanced English proficiency that integrates the four skills.		
Course Objectives and Overview	This course meets twice a week and aims ① to strengthen overall English proficiency and ② to improve scores on the TOEIC test. In ①, the aim is to consolidate receptive knowledge of the basic grammatical items needed to understand English and to improve the ability to express oneself in English by applying that knowledge. In class, students build knowledge through input from the textbook and other learning materials and consolidate it through exercises and output activities, with the aim of becoming able to read and listen so as to grasp the meaning accurately even in compound and complex sentences. In ②, by working on TOEIC practice problems alongside the study of 700 high-frequency words, students refine the knowledge acquired in ① into knowledge that can be used on the test. In addition, from the perspective of fostering employability, the course develops logical thinking and a broad outlook and, positioning the TOEIC as a benchmark of international applicability, enables students to acquire English proficiency, including English skills usable in international society.		
Prerequisites and Notes	This course is required for students who enrolled in academic year 2023 or later and belong to the English Communication Course. It is not required for students belonging to the Asia-Pacific Course, but they are encouraged to take it actively in order to improve their English proficiency and raise their TOEIC scores, which are learning goals of the Faculty of International Studies.		
Relation to the Diploma Policy (DP)	For the relation between this course and the Diploma Policy (DP), please refer to the following URL. https://www.keiho-u.ac.jp/faculty/taken/curriculummap.html		
Learning Outcomes	With a view to acquiring basic-level academic English, the learning objectives of this course are set as follows for vocabulary, grammar, long passages, and output. [Grammar and Vocabulary] 1. Notice the grammar and vocabulary covered in class when they appear in a text, and understand their meaning. 2. Be able to answer 70% or more correctly on the quizzes on high-frequency words given in each class. 3. Be able to answer 70% or more correctly on tests of explicit knowledge of the grammar, vocabulary, and textbook content covered in class. 3. Acquire explicit knowledge of the grammar and vocabulary covered in class and be able to explain it to others. 4. Be able to write sentences and passages with correct grammar and usage, using the grammar and vocabulary covered in class. [Long Passages] 1. Be able to understand a coherent text composed of the grammar and vocabulary covered in class and summarize it. 2. Be able to understand a coherent text composed only of the grammar and vocabulary covered in class and convey it to others, adding one's own opinions. [Output] 1. Be able to pronounce the vocabulary and sentences covered in class accurately and naturally, as in English.

Regarding taking this course	The goal of this course is to improve comprehensive English proficiency. Improving it comprehensively, that is, improving all four skills, requires an attitude of thinking for oneself, acting for oneself, and learning for oneself. Through the course, think and speak actively, and pursue the learning needed to acquire "usable English." Comprehensive learning based on English will not only raise your English proficiency by a level but also be of great help in becoming the kind of person who is needed in international society.

Theme	Study a variety of topics in English and acquire advanced English proficiency that integrates the four skills.		
Course Objectives and Overview	This course meets twice a week and aims ① to strengthen overall English proficiency and ② to improve scores on the TOEIC test. In ①, the aim is to consolidate receptive knowledge of the basic grammatical items needed to understand English and to improve the ability to express oneself in English by applying that knowledge. In class, students build knowledge through input from the textbook and other learning materials and consolidate it through exercises and output activities, with the aim of becoming able to read and listen so as to grasp the meaning accurately even in compound and complex sentences. In ②, by working on TOEIC practice problems alongside the study of 700 high-frequency words, students refine the knowledge acquired in ① into knowledge that can be used on the test. In addition, from the perspective of fostering employability, the course develops logical thinking and a broad outlook and, positioning the TOEIC as a benchmark of international applicability, enables students to acquire English proficiency, including English skills usable in international society.		
Prerequisites and Notes	This course is required for students who enrolled in academic year 2023 or later and belong to the English Communication Course. It is not required for students belonging to the Asia-Pacific Course, but they are encouraged to take it actively in order to improve their English proficiency and raise their TOEIC scores, which are learning goals of the Faculty of International Studies.

Learning Outcomes	With a view to acquiring basic-level academic English, the learning objectives of this course are set as follows for vocabulary, grammar, long passages, and output. [Grammar and Vocabulary] 1. Notice the grammar and vocabulary covered in class when they appear in a text, and understand their meaning. 2. Be able to answer 70% or more correctly on the quizzes on high-frequency words given in each class. 3. Be able to answer 70% or more correctly on tests of explicit knowledge of the grammar, vocabulary, and textbook content covered in class. 3. Acquire explicit knowledge of the grammar and vocabulary covered in class and be able to explain it to others. 4. Be able to write sentences and passages with correct grammar and usage, using the grammar and vocabulary covered in class. [Long Passages] 1. Be able to understand a coherent text composed of the grammar and vocabulary covered in class and summarize it. 2. Be able to understand a coherent text composed only of the grammar and vocabulary covered in class and convey it to others, adding one's own opinions. [Output] 1. Be able to pronounce the vocabulary and sentences covered in class accurately and naturally, as in English.

Regarding taking this course	The goal of this course is to improve comprehensive English proficiency. Improving it comprehensively, that is, improving all four skills, requires an attitude of thinking for oneself, acting for oneself, and learning for oneself. Through the course, think and speak actively, and pursue the learning needed to acquire "usable English." Comprehensive learning based on English will not only raise your English proficiency by a level but also be of great help in becoming the kind of person who is needed in international society.

Grade	G3	Teaching Method	Lecture
Course Category	Faculty of International Studies Specialized Courses		
Theme	Study a variety of topics in English and acquire advanced English proficiency that integrates the four skills.		
Course Objectives and Overview	This course meets twice a week and aims ① to strengthen overall English proficiency and ② to improve scores on the TOEIC test. In ①, the aim is to consolidate receptive knowledge of the basic grammatical items needed to understand English and to improve the ability to express oneself in English by applying that knowledge. In class, students build knowledge through input from the textbook and other learning materials and consolidate it through exercises and output activities, with the aim of becoming able to read and listen so as to grasp the meaning accurately even in compound and complex sentences. In ②, by working on TOEIC practice problems alongside the study of 700 high-frequency words, students refine the knowledge acquired in ① into knowledge that can be used on the test. In addition, from the perspective of fostering employability, the course develops logical thinking and a broad outlook and, positioning the TOEIC as a benchmark of international applicability, enables students to acquire English proficiency, including English skills usable in international society.		
Prerequisites and Notes	This course is required for students who enrolled in academic year 2023 or later and belong to the English Communication Course. It is not required for students belonging to the Asia-Pacific Course, but they are encouraged to take it actively in order to improve their English proficiency and raise their TOEIC scores, which are learning goals of the Faculty of International Studies.		
Relation to the Diploma Policy (DP)	For the relation between this course and the Diploma Policy (DP), please refer to the following URL. https://www.keiho-u.ac.jp/faculty/taken/curriculummap.html		
Learning Outcomes	With a view to acquiring basic-level academic English, the learning objectives of this course are set as follows for vocabulary, grammar, long passages, and output. [Grammar and Vocabulary] 1. Notice the grammar and vocabulary covered in class when they appear in a text, and understand their meaning. 2. Be able to answer 70% or more correctly on the quizzes on high-frequency words given in each class. 3. Be able to answer 70% or more correctly on tests of explicit knowledge of the grammar, vocabulary, and textbook content covered in class. 3. Acquire explicit knowledge of the grammar and vocabulary covered in class and be able to explain it to others. 4. Be able to write sentences and passages with correct grammar and usage, using the grammar and vocabulary covered in class. [Long Passages] 1. Be able to understand a coherent text composed of the grammar and vocabulary covered in class and summarize it. 2. Be able to understand a coherent text composed only of the grammar and vocabulary covered in class and convey it to others, adding one's own opinions. [Output] 1. Be able to pronounce the vocabulary and sentences covered in class accurately and naturally, as in English.

Course Title	Internship I	Academic Year	Spring Semester, AY2026
Instructor	MAEZURU Masakazu	Year Level	1234
Course Numbering	For course numbering, please refer to the following URL. https://www.keiho-u.ac.jp/faculty/taken/numbering.html	Credits	1 Credit
Grade	G2	Teaching Method	Practical training
Course Category	Faculty of International Studies Specialized Courses		
Theme	Learn about society, the meaning of work, and oneself through an internship (work-experience learning).		
Course Objectives and Overview	In the internship, students undertake practical training (i.e., work experience) at companies, local public bodies, and the like during the summer vacation period (August and September), when there are no classes. Through this training, they deepen their understanding of society and occupations and cultivate the views of society and work that are needed for choosing their future career paths and occupations. Before being dispatched to companies, organizations, or other establishments, students go through advance guidance or training on campus to deepen their understanding of the significance and purposes of the internship, and then complete training of at least one week (five actual working days) at the host establishment. After the training ends, students write an experience report in order to recognize the achievements and challenges of the internship.		
Prerequisites and Notes			
Relation to the Diploma Policy (DP)	For the relation between this course and the Diploma Policy (DP), please refer to the following URL. https://www.keiho-u.ac.jp/faculty/taken/curriculummap.html		
Learning Outcomes	By undertaking work experience for a certain period at companies, organizations, or other establishments and connecting university learning with practical experience in society, students become able to be conscious of their future social and occupational independence. In addition, the course provides motivation toward proactive career selection, fosters employability, including views of society and work, and raises awareness of job hunting, which is essential for realizing one's desired career path.
